About This Guide

Icon Descriptions

While reading through the User Guide you may see various icons that call attention to specific items. Below is a description of these icons:

**NOTE:** This check mark indicates that there is a note of interest and is something that you should pay special attention to while using the product.

**WARNING:** This exclamation point indicates that there is a caution or warning and it is something that could damage your property or product.

**WEB:** This globe icon indicates a noteworthy website address or e-mail address.

Online Resources

Website addresses in this document are listed without http:// in front of the address because most current web browsers do not require it. If you use an older web browser, you may have to add http:// in front of the web address.

Chapter 1: Product Overview

Thank you for choosing the Linksys Wireless-G Broadband Router with 2 Phone Ports. The Router lets you access the Internet via a wireless connection or through one of its four switched ports. You can also use the Router to share resources such as computers, printers and files. The built-in phone adapter enables Voice-over-IP (VoIP) calls even while you are using the Internet.

Front Panel

USB  The USB port is reserved for future use.

Wi-Fi Protected Setup  (White/Orange) If you have client devices, such as wireless adapters, that support Wi-Fi Protected Setup, then you can use Wi-Fi Protected Setup to automatically configure wireless security for your wireless network(s).

To use Wi-Fi Protected Setup, run the Setup Wizard, or refer to the “Wireless > Basic Wireless Settings” section of “Chapter 3: Advanced Configuration”.

The Wi-Fi Protected Setup button lights up white and stays on while wireless security is enabled on your wireless network(s). The LED lights up orange if there is an error during the Wi-Fi Protected Setup process. Make sure the client device supports Wi-Fi Protected Setup. Wait until the LED is off, and then try again.

Power  (Green/Red) The Power LED lights up green and stays on while the Router is powered on. When the Router goes through its self-diagnostic mode during every boot-up, the LED will flash. When the diagnostic is complete, it will be solidly lit green. If the LED lights up red, make sure the correct power adapter is used. If the LED remains red, contact your service provider for support.

Phone 1-2  (Green) The Phone 1 or 2 LED lights up and stays on when an active line is registered to the corresponding port on the Router’s back panel. The LED slowly flashes when voicemail messages are waiting.

Back Panel

Internet  The Internet port is where you will connect your cable or DSL Internet connection.

Phone 1-2  The Phone ports connect standard analog telephones to the Router.

Ethernet 1, 2, 3, 4  These Ethernet ports (1, 2, 3, 4) connect the Router to wired computers and other Ethernet network devices.

Power  The Power port is where you will connect the power adapter.
Reset  There are two ways to reset the Router’s factory defaults. Either press and hold the Reset button for approximately ten seconds, or restore the defaults from the Administration > Factory Defaults screen of the Router’s web-based utility. (The Factory Defaults screen allows you to restore the Router and voice defaults separately.)

 neuronal: Restoring the voice defaults may require your login (the default user name and password are admin). If the defaults do not work, contact your service provider for more information.

Side Panel

Vertical Placement

The Router has a stand on the panel opposite to the antenna. Rotate the stand 90 degrees, and place the Router on a level surface near an electrical outlet.

Placement Positions

There are three ways to physically install the Router. The first way is to place the Router horizontally on a surface. The second way is to stand the Router vertically on a surface. The third way is to mount the Router on a wall.

Horizontal Placement

The Router has four rubber feet on its bottom panel. Place the Router on a level surface near an electrical outlet.

Wall-Mounting Placement

The Router has four wall-mount slots on its back panel. The distance between two adjacent slots is 60 mm (2.36 inches).

Two screws are needed to mount the Router.

<table>
<thead>
<tr>
<th>Suggested Mounting Hardware</th>
</tr>
</thead>
<tbody>
<tr>
<td>4-5 mm</td>
</tr>
</tbody>
</table>

†Note: Mounting hardware illustrations are not true to scale.

NOTE: Linksys is not responsible for damages incurred by insecure wall-mounting hardware.

Follow these instructions:

1. Determine where you want to mount the Router. Make sure that the wall you use is smooth, flat, dry, and sturdy. Also make sure the location is within reach of an electrical outlet.
2. Drill two holes into the wall. Make sure the holes are 60 mm (2.36 inches) apart.
3. Insert a screw into each hole and leave 3 mm (0.12 inches) of its head exposed.

4. Maneuver the Router so two of the wall-mount slots line up with the two screws.

5. Place the wall-mount slots over the screws and slide the Router down until the screws fit snugly into the wall-mount slots.

Print this page at 100% size. Cut along the dotted line, and place on the wall to drill precise spacing.

Wall Mounting Template
Chapter 2: Wireless Security Checklist

Wireless networks are convenient and easy to install, so homes with high-speed Internet access are adopting them at a rapid pace. Because wireless networking operates by sending information over radio waves, it can be more vulnerable to intruders than a traditional wired network. Like signals from your cellular or cordless phones, signals from your wireless network can also be intercepted. Since you cannot physically prevent someone from connecting to your wireless network, you need to take some additional steps to keep your network secure.

1. Change the default wireless network name or SSID

Wireless devices have a default wireless network name or Service Set Identifier (SSID) set by the factory. This is the name of your wireless network, and can be up to 32 characters in length. To distinguish your wireless network from other wireless networks that may exist around you, you should change the default wireless network name to something easily recognizable, but do not use personal information (such as your Social Security number) because this information may be available for anyone to see when browsing for wireless networks.

2. Change the default password

For wireless products such as access points and routers, you will be asked for a password when you want to change their settings. These devices have a default password set by the factory. The Linksys default password is admin. Hackers know these defaults and may try to use them to access your wireless device and change your network settings. To thwart any unauthorized changes, customize the device’s password so it will be hard to guess.

3. Enable MAC address filtering

Linksys routers give you the ability to enable Media Access Control (MAC) address filtering. The MAC address is a unique series of numbers and letters assigned to every networking device. With MAC address filtering enabled, wireless network access is provided solely for wireless devices with specific MAC addresses. For example, you can specify the MAC address of each computer in your home so that only those computers can access your wireless network.

4. Enable encryption

Encryption protects data transmitted over a wireless network. Wi-Fi Protected Access (WPA/WPA2) and Wired Equivalency Privacy (WEP) offer different levels of security for wireless communication.

A network encrypted with WPA/WPA2 is more secure than a network encrypted with WEP, because WPA/WPA2 uses dynamic key encryption. To protect the information as it passes over the airwaves, you should enable the highest level of encryption supported by your network equipment.

WEP is an older encryption standard and may be the only option available on some older devices that do not support WPA.

General Network Security Guidelines

Wireless network security is useless if the underlying network is not secure.

- Password protect all computers on the network and individually password protect sensitive files.
- Change passwords on a regular basis.
- Install anti-virus software and personal firewall software.
- Disable file sharing (peer-to-peer). Some applications may open file sharing without your consent and/or knowledge.

Additional Security Tips

- Keep wireless routers, access points, or gateways away from exterior walls and windows.
- Turn wireless routers, access points, or gateways off when they are not being used (at night, during vacations).
- Use strong passphrases that are at least eight characters in length. Combine letters and numbers to avoid using standard words that can be found in the dictionary.

WEB: For more information on wireless security, visit www.linksys.com/security
Chapter 3: Advanced Configuration

After setting up the Router with the Setup Wizard (located on the CD-ROM), the Router will be ready for use. However, if you'd like to change its advanced settings, use the Router's web-based utility. This chapter describes each web page of the utility and each page's key functions. You can access the utility via a web browser on a computer connected to the Router.

The web-based utility has these main tabs: Setup, Wireless, Security, Access Restrictions, Applications & Gaming, Administration, Status, and Voice. Additional tabs will be available after you click one of the main tabs.

NOTE: When first installing the Router, you should use the Setup Wizard on the Setup CD-ROM. If you want to configure advanced settings, use this chapter to learn about the web-based utility.

How to Access the Web-Based Utility

To access the web-based utility, launch the web browser on your computer, and enter the Router's default IP address, 192.168.15.1, in the Address field. Then press Enter.

NOTE: If you place the Router behind a primary router with the IP address of 192.168.15.1, then the Router will automatically assume a new default IP address, 192.168.16.1.

A login screen appears. The first time you open the web-based utility, use the default user name and password, admin. (You can set a new password from the Administration tab's Management screen.) Click OK to continue.

Setup > Basic Setup

The first screen that appears is the Basic Setup screen. This allows you to change the Router's general settings.

Internet Setup

The Internet Setup section configures the Router to your Internet connection. Most of this information can be obtained through your service provider.

Internet Connection Type

Select the type of Internet connection your service provider supports from the drop-down menu. These are the available types:

- Automatic Configuration - DHCP
- Static IP
- PPPoE
- PPTP
- L2TP
- Telstra Cable

Automatic Configuration - DHCP

By default, the Router’s Internet Connection Type is set to Automatic Configuration - DHCP, which should be kept only if your service provider supports DHCP or you are connecting through a dynamic IP address. (This option usually applies to cable connections.)
Static IP

If you are required to use a permanent IP address to connect to the Internet, select Static IP.

**Internet IP Address**  This is the Router’s IP address, when seen from the Internet. Your service provider will provide you with the IP address you need to specify here.

**Subnet Mask**  This is the Router’s Subnet Mask, as seen by users on the Internet (including your service provider). Your service provider will provide you with the Subnet Mask.

**Default Gateway**  Your service provider will provide you with the IP address of the service provider server.

**PPPoE**

Some DSL-based service providers use PPPoE (Point-to-Point Protocol over Ethernet) to establish Internet connections. If you are connected to the Internet through a DSL line, check with your service provider to see if they use PPPoE. If they do, you will have to enable PPPoE.

**User Name and Password**  Enter the User Name and Password provided by your service provider.

**Service Name (Optional)**  If provided by your service provider, enter the Service Name.

**Connect on Demand: Max Idle Time**  You can configure the Router to cut the Internet connection after it has been inactive for a specified period of time (Max Idle Time). If your Internet connection has been terminated due to inactivity, Connect on Demand enables the Router to automatically re-establish your connection as soon as you attempt to access the Internet again. To use this option, select Connect on Demand. In the Max Idle Time field, enter the number of minutes you want to have elapsed before your Internet connection terminates. The default Max Idle Time is 5 minutes.

**Keep Alive: Redial Period**  If you select this option, the Router will periodically check your Internet connection. If you are disconnected, then the Router will automatically re-establish your connection. To use this option, select Keep Alive. In the Redial Period field, you specify how often you want the Router to check the Internet connection. The default Redial Period is 30 seconds.

**PPTP**

Point-to-Point Tunneling Protocol (PPTP) is a service that applies to connections in Europe only.

**Internet IP Address**  This is the Router’s IP address, as seen from the Internet. Enter the IP address provided by your service provider.

**Subnet Mask**  This is the Router’s Subnet Mask, as seen by users on the Internet (including your service provider). Enter the Subnet Mask provided by your service provider.

**Default Gateway**  Enter the IP address of the service provider server, which is provided by your service provider.

**User Name and Password**  Enter the User Name and Password provided by your service provider.

**Connect on Demand: Max Idle Time**  You can configure the Router to cut the Internet connection after it has been inactive for a specified period of time (Max Idle Time). If your Internet connection has been terminated due to inactivity, Connect on Demand enables the Router to automatically re-establish your connection as soon as you attempt to access the Internet again. To use this option, select Connect on Demand. In the Max Idle Time field, enter the number of minutes you want to have elapsed before your Internet connection terminates. The default Max Idle Time is 5 minutes.

**Keep Alive: Redial Period**  If you select this option, the Router will periodically check your Internet connection. If you are disconnected, then the Router will automatically re-establish your connection. To use this option, select Keep Alive. In the Redial Period field, you specify how often you want the Router to check the Internet connection. The default value is 30 seconds.
L2TP

L2TP is a service that applies to connections in Europe and Israel.

Server IP Address  This is the IP address of the L2TP Server. Enter the IP address provided by your service provider.

User Name and Password  Enter the User Name and Password provided by your service provider.

Connect on Demand: Max Idle Time  You can configure the Router to cut the Internet connection after it has been inactive for a specified period of time (Max Idle Time). If your Internet connection has been terminated due to inactivity, Connect on Demand enables the Router to automatically re-establish your connection as soon as you attempt to access the Internet again. To use this option, select Connect on Demand. In the Max Idle Time field, enter the number of minutes you want to have elapsed before your Internet connection terminates. The default Max Idle Time is 5 minutes.

Keep Alive: Redial Period  If you select this option, the Router will periodically check your Internet connection. If you are disconnected, then the Router will automatically re-establish your connection. To use this option, select Keep Alive. In the Redial Period field, you specify how often you want the Router to check the Internet connection. The default Redial Period is 30 seconds.

Optional Settings

Some of these settings may be required by your service provider. Verify with your service provider before making any changes.

Host Name and Domain Name  These fields allow you to supply a host and domain name for the Router. Some service providers, usually cable service providers, require these names as identification. You may have to check with your service provider to see if your broadband Internet service has been configured with a host and domain name. In most cases, leaving these fields blank will work.

MTU  MTU is the Maximum Transmission Unit. It specifies the largest packet size permitted for Internet transmission. Select Manual if you want to manually enter the largest packet size that is transmitted. To have the Router select the best MTU for your Internet connection, keep the default setting, Auto.

Size  When Manual is selected in the MTU field, this option is enabled. Leave this value in the 576 to 1500 range. The default size depends on the Internet Connection Type:

- DHCP or Static IP: 1500
- PPPoE: 1492
- PPTP or L2TP: 1460
- Telstra Cable: 1500

Static DNS 1-3  The Domain Name System (DNS) is how the Internet translates domain or website names into
Internet addresses or URLs. Enter the IP address of the DNS server, which is provided by your service provider. If you wish to use a different DNS server, enter its IP address in one of these fields. You can enter up to three DNS server IP addresses here. The Router will use these for quicker access to functioning DNS servers. By default, the Router uses 192.168.15.1 for DNS.

**Network Setup**

The Network Setup section changes the settings on the network connected to the Router’s Ethernet ports. Wireless setup is performed through the Wireless tab.

**Router IP**

This presents both the Router’s Local IP Address and Subnet Mask as seen by your network.

![Router IP](image)

**DHCP Server Setting**

The settings allow you to configure the Router’s Dynamic Host Configuration Protocol (DHCP) server function. The Router can be used as a DHCP server for your network. A DHCP server automatically assigns an IP address to each computer on your network. If you choose to enable the Router's DHCP server option, make sure there is no other DHCP server on your network.

- **Select Clients from DHCP Table** Click the Select check box to reserve a client’s IP address. Then click Add Clients.
- **Manually Adding Client** To manually assign an IP address, enter the client’s name in the Enter Client Name field. Enter the IP address you want it to have in the Assign IP Address field. Enter its MAC address in the To This MAC Address field. Then click Add.

**Clients Already Reserved**

A list of DHCP clients and their fixed local IP addresses will be displayed at the bottom of the screen. If you want to remove a client from this list, click Remove. Click Save Settings to apply your changes, or click Cancel Changes to cancel your changes. To view the most up-to-date information, click Refresh. To exit this screen, click Close.

**DNS Proxy** The DNS proxy relays DNS requests to the current public network DNS server for the proxy, and it replies as a DNS resolver to the client device on the network. To enable the DNS Proxy feature, select Enabled. To disable the DNS Proxy feature, keep the default, Disabled.

**Starting IP Address** Enter a value for the DHCP server to start with when issuing IP addresses. Because the Router’s default IP address is 192.168.15.1, the Starting IP Address must be 192.168.15.2 or greater, but smaller than 192.168.15.253. The default Starting IP Address is 192.168.15.100.

**Maximum DHCP Users** Enter the maximum number of computers that you want the DHCP server to assign IP addresses to. This number cannot be greater than 253. The default is 50.

**IP Address Range** Displayed here is the range of available IP addresses.

**Client Lease Time** The Client Lease Time is the amount of time a network user will be allowed connection to the...
Router with their current dynamic IP address. Enter the amount of time, in minutes, that the user will be “leased” this dynamic IP address. After the time is up, the user will be automatically assigned a new dynamic IP address. The default is 0 minutes, which means one day.

**Static DNS** The Domain Name System (DNS) is how the Internet translates domain or website names into Internet addresses or URLs. Enter the local IP address of the DNS server, which is provided by your service provider. If you wish to use a different DNS server, enter that IP address in this field. The Router will use this for quicker access to a functioning DNS server.

**WINS** The Windows Internet Naming Service (WINS) manages each PC’s interaction with the Internet. If you use a WINS server, enter that server’s IP address here. Otherwise, leave this blank.

**Time Setting**

**Time Zone** Select the time zone in which your network functions from this drop-down menu.

**Automatically adjust clock for daylight saving changes** Select this option if you want the Router to automatically adjust for daylight saving time. This option is enabled by default.

**Time Server Address** If you want to use the Router’s default Network Time Protocol (NTP) server, keep the default, Auto. If you want to specify the NTP server, select Manual, and enter the URL or IP address of the NTP server you want to use.

**Resync Timer** The timer controls how often the Router resyncs with the NTP server. Enter the number of seconds you want the interval to be, or keep the default, 3600 seconds.

Click *Save Settings* to apply your changes, or click *Cancel Changes* to cancel your changes.

**Setup > DDNS**

The Router offers a Dynamic Domain Name System (DDNS) feature. DDNS lets you assign a fixed host and domain name to a dynamic Internet IP address. It is useful when you are hosting your own website, FTP server, or other server behind the Router.

Before you can use this feature, you need to sign up for DDNS service with a DDNS service provider, www.dyndns.org or www.TZO.com. If you do not want to use this feature, keep the default setting, **Disabled**.

**DDNS**

**DDNS Service**

If your DDNS service is provided by DynDNS.org, then select **DynDNS.org** from the drop-down menu. If your DDNS service is provided by TZO, then select **TZO.com**. The features available on the DDNS screen will vary, depending on which DDNS service provider you use.

**DynDNS.org**

**User Name** Enter the User Name for your DDNS account.

**Password** Enter the Password for your DDNS account.

**Host Name** The is the DDNS URL assigned by the DDNS service.

**System** Select the DynDNS service you use: **Dynamic**, **Static**, or **Custom**. The default selection is **Dynamic**.

**Mail Exchange (Optional)** Enter the address of your mail exchange server, so e-mails to your DynDNS address go to your mail server.

**Backup MX** This feature allows the mail exchange server to be a backup. To disable this feature, keep the default, **Disabled**. To enable the feature, select **Enabled**. If you are not sure which setting to select, keep the default, **Disabled**.

**Wildcard** This setting enables or disables wildcards for your host. For example, if your DDNS address is myplace.dyndns.org and you enable wildcards, then x.myplace.dyndns.org will work as well (x is the wildcard). To disable wildcards, keep the default, **Disabled**. To enable wildcards, select **Enabled**. If you are not sure which setting to select, keep the default, **Disabled**.

**Internet IP Address** The Router’s Internet IP address is displayed here. Because it is dynamic, it will change.
Status The status of the DDNS service connection is displayed here.

Update To manually trigger an update, click this button. Click Save Settings to apply your changes, or click Cancel Changes to cancel your changes.

MAC Address Clone

Enabled/Disabled To have the MAC address cloned, select Enabled.

MAC Address Enter the MAC address registered with your service provider here.

Clone Your PC’s MAC Click this button to clone the MAC address of the computer you are using. Click Save Settings to apply your changes, or click Cancel Changes to cancel your changes.

Setup > Advanced Routing

This screen is used to set up the Router’s advanced functions. Operating Mode allows you to select the type(s) of advanced functions you use. Dynamic Routing automatically adjusts how packets travel on your network. Static Routing sets up a fixed route to another network destination.

Advanced Routing

PPPoE Relay

Enabled/Disabled The PPPoE Relay feature enables an L2TP Access Concentrator (LAC) to relay active discovery and service selection functionality for PPP over Ethernet (PPPoE), over a Layer 2 Tunneling Protocol (L2TP) control channel, to an L2TP Network Server (LNS) or tunnel switch (multihop node). The relay functionality of this feature allows the LNS or tunnel switch to advertise the services it offers to the client, thereby providing end-to-end control of services between the LNS and a PPPoE client.

To enable the PPPoE Relay feature for the Internet side, select Enabled. To disable the PPPoE Relay feature, keep the default, Disabled.
NAT

**Enabled/Disabled** If this Router is hosting your network’s connection to the Internet, keep the default, Enabled. If another router exists on your network, select Disabled. When the NAT setting is disabled, dynamic routing will be enabled.

**Dynamic Routing (RIP)**

**Enabled/Disabled** This feature enables the Router to automatically adjust to physical changes in the network’s layout and exchange routing tables with the other router(s). The Router determines the network packets’ route based on the fewest number of hops between the source and the destination. When the NAT setting is enabled, the Dynamic Routing feature is automatically disabled. When the NAT setting is disabled, this feature is available. Select Enabled to use the Dynamic Routing feature.

**Static Routing**

A static route is a pre-determined pathway that network information must travel to reach a specific host or network. Enter the information described below to set up a new static route.

**Route Entries** To set up a static route between the Router and another network, select a number from the drop-down list. Click **Delete This Entry** to delete a static route.

**Enter Route Name** Enter a name for the Route here, using a maximum of 25 alphanumeric characters.

**Destination LAN IP** The Destination LAN IP is the address of the remote network or host to which you want to assign a static route.

**Subnet Mask** The Subnet Mask determines which portion of a Destination LAN IP address is the network portion, and which portion is the host portion.

**Gateway** This is the IP address of the gateway device that allows for contact between the Router and the remote network or host.

**Interface** This interface tells you whether the Destination LAN IP address is on the **LAN and Wireless** (Ethernet and wireless networks) or the **Internet (WAN)**.

Click **Show Routing Table** to view the static routes you have already set up.

**Routing Table**

For each route, the Destination LAN IP address, Subnet Mask, Gateway, and Interface are displayed. Click **Refresh** to update the information. Click **Close** to exit this screen.

Click **Save Settings** to apply your changes, or click **Cancel Changes** to cancel your changes.

**Wireless > Basic Wireless Settings**

The basic settings for wireless networking are set on this screen.

There are two ways to configure the Router’s wireless network(s), manual and Wi-Fi Protected Setup.

Wi-Fi Protected Setup is a feature that makes it easy to set up your wireless network. If you have client devices, such as wireless adapters, that support Wi-Fi Protected Setup, then you can use Wi-Fi Protected Setup.

**Wireless Configuration** To use Wi-Fi Protected Setup, keep the default, **Wi-Fi Protected Setup**. Proceed to the
“Wi-Fi Protected Setup” section. To manually configure your wireless network, select Manual. Proceed to the “Wireless Network” section.

NOTE: Wi-Fi Protected Setup is available for your primary wireless network (SSID1) only. To configure your second wireless network (SSID2), select Manual.

If you are unable to configure the second wireless network, contact your service provider for more information (these settings may be controlled by your service provider).

Wi-Fi Protected Setup

There are three methods available. Use the method that applies to the client device you are configuring.

Method #1

Use this method if your client device has a Wi-Fi Protected Setup button.

1. Click or press the Wi-Fi Protected Setup button on the client device.
2. Click the Wi-Fi Protected Setup button on this screen.
3. After the client device has been configured, click OK. Then refer back to your client device or its documentation for further instructions.

Method #2

Use this method if your client device has a Wi-Fi Protected Setup PIN number.

1. Enter the PIN number in the field on this screen.
2. Click Register.
3. After the client device has been configured, click OK. Then refer back to your client device or its documentation for further instructions.

Method #3

Use this method if your client device asks for the Router’s PIN number.
1. Enter the PIN number listed on this screen. (It is also listed on the label on the bottom of the Router.)
2. After the client device has been configured, click OK. Then refer back to your client device or its documentation for further instructions.

The Wi-Fi Protected Setup Status, Network Name (SSID), Security, Encryption, and Passphrase are displayed at the bottom of the screen.

NOTE: If you have client devices that do not support Wi-Fi Protected Setup, note the wireless settings, and then manually configure those client devices.

**Wireless Network**

**Network Mode** From this drop-down menu, you can select the wireless standards running on your network(s). If you have Wireless-G and Wireless-B devices in your network(s), keep the default setting, **Mixed**. If you have only Wireless-G devices, select **Wireless-G only**. If you have only Wireless-B devices, select **Wireless-B only**.

**Wireless Channel** Select the channel you want to use. To allow the Router to select the best available wireless channel, keep the default, **Auto**.

**SSID1/2** The SSID is the network name shared among all devices in a wireless network. The Router can support up to two wireless networks. By default, one wireless network is enabled, and you can create a second wireless network.

Configure the following settings for each wireless network:

- **Wireless Network Name (SSID)** The default wireless network uses this name: “linksys” followed by the last four digits of the Router’s wireless MAC address. To rename the default wireless network, enter a unique Wireless Network Name, which is case-sensitive and must not exceed 32 characters (use any of the characters on the keyboard).

To create a second wireless network, select **Network Enabled** for the SSID2 setting. Then enter a unique Wireless Network Name. 

NOTE: If you are unable to configure the SSID2 settings, contact your service provider for more information.

- **SSID Broadcast Enabled** When wireless clients survey the local area for wireless networks to associate with, they detect the SSID broadcast by the Router. If you want to broadcast the SSID, keep the check box selected. If you do not want to broadcast the SSID, deselect the check box.

- **For Internet Access Only** On your second wireless network (SSID2), you can set up guest access, which allows guests Internet access while blocking them from access to your local network. (For example, guests will be blocked from access to your local computers and their private data.) To limit guests to Internet access only, keep the check box selected. To allow local network access, deselect the check box.

NOTE: SSID1 does not support the For Internet Access Only feature.

- **Network Enabled** To enable the wireless network, select the check box. To disable the wireless network, deselect the check box.

Click **Save Settings** to apply your changes, or click **Cancel Changes** to cancel your changes.

**Wireless > Wireless Security**

The **Wireless Security** screen configures the security of your wireless network(s). The Router supports the following wireless security mode options: WPA Personal, WPA Enterprise, WPA2 Personal, WPA2 Enterprise, and WEP. (WPA stands for Wi-Fi Protected Access, which is a security standard stronger than WEP encryption. WEP stands for Wired Equivalent Privacy.) These options are briefly discussed here. For detailed instructions on configuring wireless security for the Router, refer to “Chapter 2: Wireless Security.”

NOTE: If you used Wi-Fi Protected Setup to configure your wireless network(s), then wireless security has already been set up for your primary wireless network. Do not make changes to the Wireless Security screen for your primary wireless network.
Wireless Security

Select a SSID  Select the appropriate SSID. (If you enabled the second wireless network on the Basic Wireless Settings screen, then set up wireless security for each SSID.)

Security Mode

Select the security method for your wireless network. Proceed to the appropriate instructions. If you do not want to use wireless security, keep the default, Disabled.

WPA Personal

**NOTE:** If you are using WPA, always remember that each device in your wireless network MUST use the same WPA method and shared key, or else the network will not function properly.

WPA Algorithms  WPA supports two encryption methods, TKIP and AES, with dynamic encryption keys. Select the type of algorithm, TKIP or AES. The default is TKIP.

WPA Shared Key  Enter a WPA Shared Key of 8-63 characters.

Group Key Renewal  Enter a Group Key Renewal period, which instructs the Router how often it should change the encryption keys. The default is 3600 seconds.

WPA2 Personal

WPA Algorithms  WPA2 supports two encryption methods, TKIP and AES, with dynamic encryption keys. Select the type of algorithm, AES or TKIP + AES. The default is TKIP + AES.

WPA Shared Key  Enter a WPA Shared Key of 8-63 characters.

Group Key Renewal  Enter a Group Key Renewal period, which instructs the Router how often it should change the encryption keys. The default is 3600 seconds.

WPA Enterprise

This option features WPA used in coordination with a RADIUS server. (RADIUS stands for Remote Authentication Dial-In User Service. This option should only be used when a RADIUS server is connected to the Router.)

WPA Algorithms  WPA supports two encryption methods, TKIP and AES, with dynamic encryption keys. Select the type of algorithm, TKIP or AES. The default is TKIP.

RADIUS Server Address  Enter the IP address of the RADIUS server.

RADIUS Port  Enter the port number of the RADIUS server. The default value is 1812.

Shared Key  Enter the key shared between the Router and the server.

Key Renewal Timeout  Enter a Key Renewal Timeout period, which instructs the Router how often it should change the encryption keys. The default is 3600 seconds.

WPA2 Enterprise

This option features WPA2 used in coordination with a RADIUS server. (It should only be used when a RADIUS server is connected to the Router.)
Chapter 3

Advanced Configuration

Security Mode > WPA2 Enterprise

WPA Algorithms WPA2 supports two encryption methods, TKIP and AES, with dynamic encryption keys. Select the type of algorithm, AES or TKIP + AES. The default is TKIP + AES.

RADIUS Server Address Enter the IP address of the RADIUS server.

RADIUS Port Enter the port number of the RADIUS server. The default value is 1812.

Shared Key Enter the key shared between the Router and the server.

Key Renewal Timeout Enter a Key Renewal Timeout period, which instructs the Router how often it should change the encryption keys. The default is 3600 seconds.

WEP

WEP is a basic encryption method, which is not as secure as WPA.

Encryption Select a level of WEP encryption, 64 bits 10 hex digits or 128 bits 26 hex digits. The default is 64 bits 10 hex digits.

Passphrase Enter a Passphrase to automatically generate WEP keys. Then click Generate.

Key 1-4 If you did not enter a Passphrase, enter the WEP key(s) manually.

TX Key Select which TX (Transmit) Key to use. The default is 1.

Click Save Settings to apply your changes, or click Cancel Changes to cancel your changes.

Wireless > Wireless MAC Filter

Wireless access can be filtered by using the MAC addresses of the wireless devices transmitting within your network’s radius.

Wireless MAC Filter

Select a SSID Select the appropriate SSID. (If you enabled the second wireless network on the Basic Wireless Settings screen, then set up wireless MAC filtering for each SSID.)

Wireless MAC Filter To filter wireless users by MAC address, either permitting or blocking access, select Enabled. If you do not wish to filter users by MAC address, keep the default setting, Disabled.

Access Restriction

Prevent Select this to block wireless access by MAC address. This button is selected by default.

Permit Select this to allow wireless access by MAC address. This button is not selected by default.
### MAC Address Filter List

**Wireless Client List** Click this to open the *Wireless Client List* screen.

![Wireless Client List](image)

**Wireless Client List**

This screen shows the online and offline devices of the wireless network(s). The device information includes Client Name, IP Address, MAC Address, and Status.

Select **Save to MAC Address Filter List** for any device you want to add to the MAC Address Filter List. Then click **Add**.

To retrieve the most up-to-date information, click **Refresh**. To exit this screen and return to the *Wireless MAC Filter* screen, click **Close**.

**MAC 01-40** Enter the MAC addresses of the devices whose wireless access you want to block or allow.

Click **Save Settings** to apply your changes, or click **Cancel Changes** to cancel your changes.

### Wireless > Advanced Wireless Settings

The *Advanced Wireless Settings* screen is used to set up the Router’s advanced wireless functions. These settings should only be adjusted by an expert administrator as incorrect settings can reduce wireless performance.

![Wireless > Advanced Wireless Settings](image)

**Advanced Wireless**

**Authentication Type** The default is set to **Auto**, which allows either Open System or Shared Key authentication to be used. With Open System authentication, the sender and the recipient do NOT use a WEP key for authentication. With Shared Key authentication, the sender and recipient use a WEP key for authentication. Select **Shared Key** to only use Shared Key authentication.

**Transmission Rate** The rate of data transmission should be set depending on the speed of your wireless network(s). You can select from a range of transmission speeds, or you can select **Auto** to have the Router automatically use the fastest possible data rate and enable the Auto-Fallback feature. Auto-Fallback will negotiate the best possible connection speed between the Router and a wireless client. The default is **Auto**.

**CTS Protection Mode** The Router will automatically use CTS (Clear-To-Send) Protection Mode when your Wireless-G products are experiencing severe problems and are not able to transmit to the Router in an environment with heavy 802.11b traffic. This function boosts the Router’s ability to catch all Wireless-G transmissions but will severely decrease performance. The default is **Auto**.

**Beacon Interval** Enter a value between 1 and 65,535 milliseconds. The Beacon Interval value indicates the frequency interval of the beacon. A beacon is a packet broadcast by the Router to synchronize the wireless network(s). The default value is **100**.

**DTIM Interval** This value, between 1 and 255, indicates the interval of the Delivery Traffic Indication Message (DTIM). A DTIM field is a countdown field informing clients of the next window for listening to broadcast and multicast messages. When the Router has buffered broadcast or multicast messages for associated clients, it sends the next DTIM with a DTIM Interval value. Its clients hear the beacons and awaken to receive the broadcast and multicast messages. The default value is **1**.

**RTS Threshold** Should you encounter inconsistent data flow, only minor reduction of the default value, **2347**, is recommended. If a network packet is smaller than the preset RTS threshold size, the RTS/CTS mechanism will not be enabled. The Router sends Request to Send (RTS) frames to a particular receiving station and negotiates the sending of a data frame. After receiving an RTS, the wireless station responds with a Clear to Send (CTS) frame to acknowledge the right to begin transmission. The RTS Threshold value should remain at its default value of **2347**.

Click **Save Settings** to apply your changes, or click **Cancel Changes** to cancel your changes.
Security > Firewall

The Firewall screen is used to configure a firewall that can filter out various types of unwanted traffic on the Router’s local network.

Firewall

**SPI Firewall Protection**  To use firewall protection, keep the default, **Enabled**. To turn off firewall protection, select **Disabled**.

**Internet Filter**

**Filter Anonymous Internet Requests**  This feature makes it more difficult for outside users to work their way into your network. This feature is selected by default. Deselect the feature to allow anonymous Internet requests.

**Filter Internet NAT Redirection**  This feature uses port forwarding to block access to local servers from local networked computers. Select this feature to filter Internet NAT redirection. It is not selected by default.

**Filter IDENT (Port 113)**  This feature keeps port 113 from being scanned by devices outside of your local network. This feature is selected by default. Deselect this feature to disable it.

**Web Filter**

**Proxy**  Use of WAN proxy servers may compromise the Router’s security. Denying Proxy will disable access to any WAN proxy servers. Select this feature to enable proxy filtering. Deselect the feature to allow proxy access.

**Java**  Java is a programming language for websites. If you deny Java, you run the risk of not having access to Internet sites created using this programming language. Select this feature to enable Java filtering. Deselect the feature to allow Java usage.

**ActiveX**  ActiveX is a programming language for websites. If you deny ActiveX, you run the risk of not having access to Internet sites created using this programming language. Select this feature to enable ActiveX filtering. Deselect the feature to allow ActiveX usage.

**Cookies**  A cookie is data stored on your computer and used by Internet sites when you interact with them. Select this feature to filter cookies. Deselect the feature to allow cookie usage.

Click **Save Settings** to apply your changes, or click **Cancel Changes** to cancel your changes.

Security > VPN Passthrough

The **VPN Passthrough** screen allows you to enable VPN tunnels using IPSec, PPTP, or L2TP protocols to pass through the Router’s firewall.

**VPN Passthrough**

**IPSec Passthrough**  Internet Protocol Security (IPSec) is a suite of protocols used to implement secure exchange of packets at the IP layer. To allow IPSec tunnels to pass through the Router, keep the default, **Enabled**.

**PPTP Passthrough**  Point-to-Point Tunneling Protocol (PPTP) allows the Point-to-Point Protocol (PPP) to be tunneled through an IP network. To allow PPTP tunnels to pass through the Router, keep the default, **Enabled**.

**L2TP Passthrough**  Layer 2 Tunneling Protocol is the method used to enable Point-to-Point sessions via the Internet on the Layer 2 level. To allow L2TP tunnels to pass through the Router, keep the default, **Enabled**.

Click **Save Settings** to apply your changes, or click **Cancel Changes** to cancel your changes.

Access Restrictions > Internet Access

The **Internet Access** screen allows you to block or allow specific kinds of Internet usage and traffic, such as Internet access, designated services, and websites during specific days and times.
Internet Access Policy

Access Policy  Access can be managed by a policy. Use the settings on this screen to establish an access policy (after Save Settings is clicked). Selecting a policy from the drop-down menu will display that policy’s settings. To delete a policy, select that policy’s number and click Delete This Policy. To view all the policies, click Summary.

Summary

The policies are listed with the following information: No., Policy Name, Access, Days, Time of Day, and status (Enabled). To enable a policy, select Enabled. To delete a policy, click Delete. Click Save Settings to save your changes, or click Cancel Changes to cancel your changes. To return to the Internet Access Policy screen, click Close.

Status  Policies are disabled by default. To enable a policy, select the policy number from the drop-down menu, and select Enabled.

To create a policy, follow steps 1-11. Repeat these steps to create additional policies, one at a time.

1. Select a number from the Access Policy drop-down menu.
2. Enter a Policy Name in the field provided.
3. To enable this policy, select Enabled.
4. Click Edit List to select which computers will be affected by the policy. The List of PCs screen appears. You can select a PC by MAC address or IP address. You can also enter a range of IP addresses if you want this policy to affect a group of computers. After making your changes, click Save Settings to apply your changes, or click Cancel Changes to cancel your changes. Then click Close.

5. Select the appropriate option, Deny or Allow, depending on whether you want to block or allow Internet access for the computers you listed on the List of PCs screen.
6. Decide which days and what times you want this policy to be enforced. Select the individual days during which the policy will be in effect, or select Everyday. Then enter a range of hours and minutes during which the policy will be in effect, or select 24 Hours.

7. You can block websites with specific URL addresses. Enter each URL in a separate URL field.

8. You can also block websites using specific keywords. Enter each keyword in a separate Keyword field.

9. You can filter access to various services accessed over the Internet, such as FTP or telnet. (You can block up to three applications per policy.)

From the Applications list, select the application you want to block. Then click the >> button to move it to the Blocked List. To remove an application from the Blocked List, select it and click the << button.

10. If the application you want to block is not listed or you want to edit a service’s settings, enter the application’s name in the Application Name field. Enter its range in the Port Range fields. Select its protocol from the Protocol drop-down menu. Then click Add.

To modify a service, select it from the Application list. Change its name, port range, and/or protocol setting. Then click Modify.

To delete a service, select it from the Application list. Then click Delete.

11. Click Save Settings to save the policy’s settings. To cancel the policy’s settings, click Cancel Changes.

**Applications and Gaming > Single Port Forwarding**

The Single Port Forwarding screen allows you to customize port services for common applications on this screen.

When users send these types of requests to your network via the Internet, the Router will forward those requests to the appropriate servers (computers). Before using forwarding, you should assign static IP addresses to the designated servers (use the DHCP Reservation feature on the Basic Setup screen).

**Single Port Forwarding**

Common applications are available for the first five entries. Select the appropriate application. Then enter the IP address of the server that should receive these requests. Select Enabled to activate this entry.

For additional applications, complete the following fields:

- **Application Name**: Enter the name you wish to give the application. Each name can be up to 12 characters.
- **External Port**: Enter the external port number used by the server or Internet application. Check with the Internet application documentation for more information.
- **Internal Port**: Enter the internal port number used by the server or Internet application. Check with the Internet application documentation for more information.
- **Protocol**: Select the protocol used for this application, either TCP, UDP, or Both.
- **To IP Address**: For each application, enter the IP address of the PC that should receive the requests. If you assigned a static IP address to the PC, then you can click DHCP Reservation on the Basic Setup screen to look up its static IP address.
- **Enabled**: For each application, select Enabled to enable port forwarding.

Click Save Settings to apply your changes, or click Cancel Changes to cancel your changes.

**Applications and Gaming > Port Range Forward**

The Port Range Forward screen allows you to set up public services on your network, such as web servers, ftp servers, e-mail servers, or other specialized Internet applications. (Specialized Internet applications are any applications...
that use Internet access to perform functions such as videoconferencing or online gaming. Some Internet applications may not require any forwarding.)

When users send these types of requests to your network via the Internet, the Router will forward those requests to the appropriate servers (computers). Before using forwarding, you should assign static IP addresses to the designated servers (use the DHCP Reservation feature on the Basic Setup screen).

If you need to forward all ports to one computer, click the DMZ tab.

Applications & Gaming > Port Range Triggering

The Port Range Triggering screen allows the Router to watch outgoing data for specific port numbers. The IP address of the computer that sends the matching data is remembered by the Router, so that when the requested data returns through the Router, the data is pulled back to the proper computer by way of IP address and port mapping rules.

Port Range Forward

To forward a port, enter the information on each line for the criteria required.

**Application Name** In this field, enter the name you wish to give the application. Each name can be up to 12 characters.

**Start-End Port** Enter the number or range of port(s) used by the server or Internet applications. Check with the Internet application documentation for more information.

**Protocol** Select the protocol used for this application, either TCP, UDP, or Both.

**To IP Address** For each application, enter the IP address of the PC running the specific application. If you assigned a static IP address to the PC, then you can click DHCP Reservation on the Basic Setup screen to look up its static IP address.

**Enabled** Select Enabled to enable port forwarding for the applications you have defined.

Click **Save Settings** to apply your changes, or click **Cancel Changes** to cancel your changes.

Applications and Gaming > DMZ

The DMZ feature allows one network computer to be exposed to the Internet for use of a special-purpose service such as Internet gaming or videoconferencing. DMZ hosting forwards all the ports at the same time to one PC. The Port Range Forwarding feature is more secure because it only opens the ports you want to have opened, while DMZ hosting opens all the ports of one computer, exposing the computer to the Internet.
Chapter 3
Advanced Configuration

DMZ

Any PC whose port is being forwarded must have its DHCP client function disabled and should have a new static IP address assigned to it because its IP address may change when using the DHCP function.

Enabled/Disabled To disable DMZ hosting, select Disabled. To expose one PC, select Enabled. Then configure the following settings:

Source IP Address If you want any IP address to be the source, select Any IP Address. If you want to specify an IP address or range of IP addresses as the designated source, select and complete the IP address range fields.

Destination If you want to specify the DMZ host by IP address, select IP Address and enter the IP address in the field provided. If you want to specify the DMZ host by MAC address, select MAC Address and enter the MAC address in the field provided. To retrieve this information, click DHCP Client Table.

DHCP Client Table

The DHCP Client Table lists computers and other devices that have been assigned IP addresses by the Router. The list can be sorted by Client Name, IP Address, and MAC Address. To select a DHCP client, click Select. To retrieve the most up-to-date information, click Refresh. To exit this screen and return to the DMZ screen, click Close.

Applications and Gaming > QoS

Quality of Service (QoS) ensures better service to high-priority types of network traffic, which may involve demanding, real-time applications, such as videoconferencing.

Wireless

WMM Support If you have other devices that support Wi-Fi Multimedia (WMM) on your network, select Enabled. Otherwise, keep the default, Disabled.

No Acknowledgement If you want to disable the Router’s Acknowledgement feature, so the Router will not re-send data if an error occurs, then select Enabled. Otherwise, keep the default, Disabled.

Internet Access Priority

In this section, you can set the bandwidth priority for a variety of applications and devices. There are four levels of priority: High, Medium, Normal, or Low. When you set priority, do not set all applications to High, because this will defeat the purpose of allocating the available bandwidth. If you want to select below normal bandwidth, select Low. Depending on the application, a few attempts may be needed to set the appropriate bandwidth priority.

Enabled/Disabled To use the QoS policies you have set, keep the default, Enabled. Otherwise, select Disabled.

Upstream Bandwidth To allow the Router to control the maximum bandwidth for upstream data transmissions, keep the default, Auto. To manually set the maximum,
Chapter 3

select **Manual**, and enter the appropriate number in the field provided.

**Category**

There are four categories available. Select one of the following: **Application**, **Online Games**, **MAC Address**, or **Ethernet Port**. Proceed to the instructions for your selection.

**Application**

**Applications** Select the appropriate application. If you select Add a New Application, follow the Add a New Application instructions.

**Priority** Select the appropriate priority: **High**, **Medium (Recommend)**, **Normal**, or **Low**.

Click **Add** to save your changes. Your new entry will appear in the Summary list.

**Add a New Application**

**Enter a Name** Enter any name to indicate the name of the entry.

**Port Range** Enter the port range that the application will be using. For example, if you want to allocate bandwidth for FTP, you can enter 21-21. If you need services for an application that uses from 1000 to 1250, you enter 1000-1250 as your settings. You can have up to three ranges to define for this bandwidth allocation. Port numbers can range from 1 to 65535. Check your application’s documentation for details on the service ports used.

Select the protocol **TCP**, **UDP**, or **Both**.

**Priority** Select the appropriate priority: **High**, **Medium (Recommend)**, **Normal**, or **Low**.

Click **Add** to save your changes. Your new entry will appear in the Summary list.

**Online Games**

**Enter a Name** Enter any name to indicate the name of the entry.

**Port Range** Enter the port range that the application will be using. For example, if you want to allocate bandwidth for FTP, you can enter 21-21. If you need services for an application that uses from 1000 to 1250, you enter 1000-1250 as your settings. You can have up to three ranges to define for this bandwidth allocation. Port numbers can range from 1 to 65535. Check your application’s documentation for details on the service ports used.

Select the protocol **TCP**, **UDP**, or **Both**.

**Priority** Select the appropriate priority: **High**, **Medium (Recommend)**, **Normal**, or **Low**.

Click **Add** to save your changes. Your new entry will appear in the Summary list.

**MAC Address**

**Enter a Name** Enter a name for your device.

**MAC Address** Enter the MAC address of your device.

**Priority** Select the appropriate priority: **High**, **Medium (Recommend)**, **Normal**, or **Low**.

Click **Add** to save your changes. Your new entry will appear in the Summary list.
Ethernet Port

Ethernet > Ethernet Port

**Ethernet** Select the appropriate Ethernet port.

**Priority** Select the appropriate priority: High, Medium (Recommend), Normal, or Low.

Click Add to save your changes. Your new entry will appear in the Summary list.

**Summary**
This lists the QoS entries you have created for your applications and devices.

**Priority** This column displays the bandwidth priority of High, Medium, Normal, or Low.

**Name** This column displays the application, device, or port name.

**Information** This column displays the port range or MAC address entered for your entry. If a pre-configured application or game was selected, there will be no valid entry shown in this section.

**Remove** Click this button to remove an entry.

**Edit** Click this button to make changes.

Click Save Settings to apply your changes, or click Cancel Changes to cancel your changes.

**Administration > Management**

The Administration > Management screen allows the network’s administrator to manage specific Router functions for access and security.
Remote Access

Remote Management To permit remote access of the Router, from outside the local network, select Enabled. Otherwise, keep the default, Disabled.

Web Utility Access HTTP (HyperText Transport Protocol) is the communications protocol used to connect to servers on the World Wide Web. HTTPS uses SSL (Secured Socket Layer) to encrypt data transmitted for higher security. Select HTTP or HTTPS. HTTP is the default.

Remote Upgrade If you want to be able to upgrade the Router remotely, from outside the local network, select Enabled. (You must have the Remote Management feature enabled as well.) Otherwise, keep the default, Disabled.

Allowed Remote IP Address If you want to be able to access the Router from any external IP address, select Any IP Address. If you want to specify an external IP address or range of IP addresses, then select the second option and complete the fields provided.

Remote Management Port Enter the port number that will be open to outside access.

NOTE: When you are in a remote location and wish to manage the Router, enter http://<Internet_IP_address>:port or https://<Internet_IP_address>:port, depending on whether you use HTTP or HTTPS. Enter the Router's specific Internet IP address in place of <Internet_IP_address>, and enter the Remote Management Port number in place of the word port.

UPnP

Universal Plug and Play (UPnP) allows Windows XP and Vista to automatically configure the Router for various Internet applications, such as gaming and videoconferencing.

UPnP If you want to use UPnP, keep the default, Enabled. Otherwise, select Disabled.

Allow Users to Configure Keep the default, Enabled, if you want to be able to make manual changes to the Router while using the UPnP feature. Otherwise, select Disabled.

Keep UPnP Configurations After System Reboot If you enable the Allow Users to Configure option, then this option will be available. Select Enabled, if you want to keep UPnP configuration settings after the Router reboots. Otherwise, keep the default, Disabled.

Allow Users to Disable Internet Access Select Enabled, if you want to be able to prohibit any and all Internet connections. Otherwise, keep the default, Disabled.

Multimedia Streaming

RTSP Support If you are experience issues with video-on-demand applications, select Enabled to improve multimedia transmissions. Using this option, the Router will establish channels with the Real Time Streaming Protocol (RTSP) server, which is located at the service provider. Otherwise, keep the default, Disabled.

IGMP

Internet Group Multicast Protocol (IGMP) is used to establish membership in a multicast group and is commonly used for multicast streaming applications. For example, you may have Internet Protocol Television (IPTV) with multiple setup boxes on the same local network. These setup boxes have different video streams running simultaneously, so you should use the IGMP feature of the Router.

Support IGMP Version Select the version you want to support, IGMP v1, IGMP v2, or IGMP v3. If you are not sure which version to select, keep the default, IGMP v2.

IGMP Proxy Keep the default, Enabled, if you want to allow multicast traffic through the Router for your multimedia application devices. Otherwise, select Disabled.

Immediate Leave Select Enabled, if you use IPTV applications and want to allow immediate channel swapping or flipping without lag or delays. Otherwise, keep the default, Disabled.

Click Save Settings to apply your changes, or click Cancel Changes to cancel your changes.

Administration > Log

The Router can keep logs of all traffic for your Internet connection.

Log

Log To disable the Log function, keep the default, Disabled. To monitor traffic between the network and the Internet, select Enabled. With logging enabled, you can choose to view temporary logs.
View Log  To view the logs, click View Log.

Log

- **Type**  Select Incoming Log, Outgoing Log, Security Log, or DHCP Client Log.
- **<Type>Log**  The Incoming Log will display a temporary log of the source IP addresses and destination port numbers for the incoming Internet traffic. The Outgoing Log will display a temporary log of the local IP addresses, destination URLs/IP addresses, and service/port numbers for the outgoing Internet traffic. The Security log will display the login information for the web-based utility. The DHCP Client Log will display the LAN DHCP server status information.

Click Refresh to update the log. Click Clear to clear all the information that is displayed.

Click Save Settings to apply your changes, or click Cancel Changes to cancel your changes.

Administration > Diagnostics

The diagnostic tests (Ping, Traceroute, and Detect Active LAN Clients) allow you to check the connections of your network devices, including connection to the Internet.

Diagnostics

Ping Test

The Ping test checks the status of a connection.

**IP or URL Address**  Enter the address of the PC whose connection you wish to test.

**Packet Size**  Enter the packet size you want to use. The default is 32 bytes.

**Times to Ping**  Enter many times you wish to test it.

**Start to Ping**  To run the test, click this button. The Ping Test screen will show if the test was successful. Click Close to return to the Diagnostics screen.

Diagnostics > Ping

Traceroute Test

The Traceroute test tests the performance of a connection.

**IP or URL Address**  Enter the address of the PC whose connection you wish to test.

**Start to Traceroute**  To run the test, click this button. The Traceroute Test screen will show if the test was successful. Click Close to return to the Diagnostics screen.
Chapter 3

Advanced Configuration

Diagnostics > Traceroute

Detect Active LAN Client(s)

Search Time Select how many seconds you wish to perform this search: 5, 10, or 15.

Start to Search To run the search, click this button. The Active LAN Client Table screen will show the search results. You can sort the results by IP Address, MAC Address, Interface, Client Name, or IP Status.

To re-run the search, click Retry. Click Close to return to the Diagnostics screen.

Administration > Active LAN Client Table

Administration > Factory Defaults

The Administration > Factory Defaults screen allows you to restore the Router's configuration to its Router and/or voice factory default settings.

NOTE: Restoring factory defaults deletes custom settings. Note your custom settings before restoring the factory defaults.

Factory Defaults

Restore Router Factory Defaults To reset the Router settings to the default values, select Yes. Then click Save Settings. Any custom Router settings you have saved will be lost when the default settings are restored.

Restore Voice Factory Defaults To reset the voice settings to the default values, select Yes. Then click Save Settings. Any custom Voice settings you have saved will be lost when the default settings are restored.

NOTE: Restoring the voice defaults may require your login (the default user name and password are admin). If the defaults do not work, contact your service provider for more information.

On the Factory Defaults screen, click Save Settings to apply your changes, or click Cancel Changes to cancel your changes.

Administration > Firmware Upgrade

The Firmware Upgrade screen allows you to upgrade the Router's firmware. Do not upgrade the firmware unless you are experiencing problems with the Router or the new firmware has a feature you want to use.

If you want to upgrade the Router’s firmware, then you may need a user name and password available only from your service provider. Contact your service provider for more information.

Username & Password

If you see the Username & Password screen, enter the User Name and Password provided by your service provider. (The factory default User Name and Password are admin.) Then click OK.
NOTE: The Router may lose the settings you have customized. Before you upgrade its firmware, use the Config Management screen to back up the Router’s settings. Refer to the Administration > Config Management section for more information.

Firmware Upgrade

Please select a file to upgrade Click Browse and select the extracted firmware upgrade file.

Start to Upgrade After you have selected the appropriate file, click this button, and follow the on-screen instructions.

Administration > Config Management
The Config Management screen allows you to back up or restore the Router’s settings using a configuration file.

Backup Configuration
Backup To save the Router’s settings in a configuration file, click this button and follow the on-screen instructions.

Restore Configuration
To use this option, you must have previously backed up its configuration settings.

Please select a file to restore Click the Browse button and select the Router’s configuration file.

Restore To restore the Router’s configuration settings, click this button and follow the on-screen instructions.

Status > Router
The Router screen displays information about the Router.

Router Information
Firmware Version The version number of the Router’s current firmware is displayed.
**Chapter 3**

**Advanced Configuration**

**Current Time** The time set on the Router is displayed.

**Internet MAC Address** The Router’s MAC address, as seen by your service provider, is displayed.

**Router Name** The name of the Router is displayed.

**Host Name** If required by your service provider, this was entered on the Basic Setup screen.

**Domain Name** If required by your service provider, this was entered on the Basic Setup screen.

**Internet Connection**

This section shows the current network information. It varies depending on the Internet connection type selected on the Basic Setup screen.

Click **Refresh** to update the on-screen information.

**Status > Local Network**

The Local Network screen displays information about the local, wired network.

**End IP Address** For the range of IP addresses used by devices on your local network, the ending IP address is displayed.

**DHCP Clients Table** Click this button to view a list of computers that are using the Router as a DHCP server.

Click **Delete** to remove a DHCP client. To retrieve the most up-to-date information, click **Refresh**. To exit this screen and return to the Local Network screen, click **Close**.

**DHCP Client Table**

The DHCP Client Table lists computers and other devices that have been assigned IP addresses by the Router. The list can be sorted by Client Name, IP Address, Interface, MAC Address, and Expires Time (how much time is left for the current IP address). To remove a DHCP client, click **Delete**. To retrieve the most up-to-date information, click **Refresh**. To exit this screen and return to the Local Network screen, click **Close**.

**Status > Wireless Network**

The Wireless Network screen displays information about your wireless network(s).

**Local Network**

**Local MAC Address** The MAC address of the Router’s local, wired interface is displayed.

**Router IP Address** The Router’s IP address, as it appears on your local network, is displayed.

**Subnet Mask** The Subnet Mask of the Router is displayed.

**DHCP Server**

**DHCP Server** The status of the Router’s DHCP server function is displayed.

**Start IP Address** For the range of IP addresses used by devices on your local network, the starting IP address is displayed.

**Wireless Network**

**Channel** The channel of the wireless network(s) is displayed.

**Mode** The wireless mode is displayed.
Chapter 3

Advanced Configuration

Wireless Network 1-2

Status information for each wireless network is displayed.

**Wireless MAC Address** The wireless MAC address of the Router's local, wireless interface is displayed.

**Network Name (SSID)** The network name, which is also called the SSID, is displayed.

**Security** The wireless security method is displayed.

**SSID Broadcast** The status of the SSID Broadcast feature is displayed.

Access to the Voice Screens

There are two levels of access, user and Admin Login. When you click the Voice tab, the *Info* screen is automatically displayed. If you set a User Password on the *System* screen, then you will be asked to enter it before the *Info* screen is displayed.

The Admin Login allows access to more advanced settings. To access administrative screens, click *Admin Login*, and enter the user name and password provided by your service provider. Contact your service provider for more information. (The factory default Admin Login name and password are *admin*.)

NOTE: In most cases, you do not need to use the administrative screens. Contact your service provider for more information.

Voice > Info

The *Info* screen displays Voice over Internet Protocol (VoIP) information about the Router.

**Product Information**

**Product Name** The model number of the Router is displayed.

**Serial Number** The serial number of the Router is displayed.

**Software Version** The version number of the Router software is displayed.

**Hardware Version** The version number of the Router hardware is displayed.

**MAC Address** The MAC address of the Router is displayed.

**Client Certificate** The status of the client certificate, which indicates that the Router has been authorized by your service provider, is displayed.

**System Status**

**Current Time** The current date and time of the Router are displayed.
**Elapsed Time**  The amount of time elapsed since the last reboot of the Router is displayed.

**RTP Packets Sent**  The number of RTP packets sent by the Router is displayed.

**RTP Bytes Sent**  The number of RTP bytes sent by the Router is displayed.

**RTP Packets Recv**  The number of RTP packets received by the Router is displayed.

**RTP Bytes Recv**  The number of RTP bytes received by the Router is displayed.

**SIP Messages Sent**  The number of SIP messages sent by the Router is displayed.

**SIP Bytes Sent**  The number of SIP bytes sent by the Router is displayed.

**SIP Messages Recv**  The number of SIP messages received by the Router is displayed.

**SIP Bytes Recv**  The number of SIP bytes received by the Router is displayed.

**External IP**  The external IP address used for NAT mapping is displayed.

**Line 1/2 Status**

Lines 1 and 2 have the same status information available.

**Hook State**  The status of the Internet phone line’s readiness is displayed. “On” indicates that it is ready for use, while “Off” indicates that it is in use.

**Registration State**  The status of the line’s registration with the service provider is displayed.

**Last Registration At**  The last date and time the line was registered are displayed.

**Next Registration In**  The number of seconds until the next registration is displayed.

**Message Waiting**  This indicates whether you have new voicemail waiting.

**Call Back Active**  This indicates whether a call back request is in progress.

**Last Called Number**  The last number called is displayed.

**Last Caller Number**  The number of the last caller is displayed.

**Mapped SIP Port**  The port number of the NAT mapped SIP port is displayed.

Calls 1 and 2 have the same status information available.

**Call 1/2 State**  The status of the call is displayed.

**Call 1/2 Tone**  The type of tone used by the call is displayed.

**Call 1/2 Encoder**  The codec used for encoding is displayed.

**Call 1/2 Decoder**  The codec used for decoding is displayed.

**Call 1/2 FAX**  The status of the fax pass-through mode is displayed.

**Call 1/2 Type**  The direction of the call is displayed.

**Call 1/2 Remote Hold**  This indicates whether the far end has placed the call on hold.

**Call 1/2 Callback**  This indicates whether the call was triggered by a call back request.

**Call 1/2 Peer Name**  The name of the internal phone is displayed.

**Call 1/2 Peer Phone**  The phone number of the internal phone is displayed.

**Call 1/2 Duration**  The duration of the call is displayed.

**Call 1/2 Packets Sent**  The number of packets sent is displayed.

**Call 1/2 Packets Recv**  The number of packets received is displayed.

**Call 1/2 Bytes Sent**  The number of bytes sent is displayed.

**Call 1/2 Bytes Recv**  The number of bytes received is displayed.

**Call 1/2 Decode Latency**  The number of milliseconds for decoder latency is displayed.

**Call 1/2 Jitter**  The number of milliseconds for receiver jitter is displayed.

**Call 1/2 Round Trip Delay**  The number of milliseconds for delay is displayed.

**Call 1/2 Packets Lost**  The number of packets lost is displayed.

**Call 1/2 Packet Error**  The number of invalid packets received is displayed.

**Call 1/2 Mapped RTP Port**  The number of the NAT mapped RTP port is displayed.

**Call 1/2 Media Loopback**  The Media Loopback feature allows the service provider to test the quality of the connection to the Router. The status of the feature is displayed.
Voice > System

The System screen displays the User Password setting.

System Configuration

User Password  Enter the password for user access to the Voice screens. (By default, there is no password.)

Miscellaneous Settings

No settings are displayed.

Click Save Settings to apply your change, or click Cancel Changes to cancel your change.

Voice > User 1/2

The User 1 and 2 screens display similar settings. The User 1 screen displays settings for users of phone line 1, and the User 2 screen displays settings for users of phone line 2.

Call Forward Settings

Enter the call forwarding numbers you want to use.

Cfwd All Dest  Enter the number for the Call Forward All Service feature (when you want to forward all calls).

Cfwd Busy Dest  Enter the number for the Call Forward Busy feature (when the line is busy).

Cfwd No Ans Dest  Enter the number for the Call Forward No Answer feature (when the line is not answered).

Cfwd No Ans Delay  Enter the number of seconds to wait before the Call Forward No Answer feature is triggered. The default is 20.

Selective Call Forward Settings

Enter the caller numbers that will be forwarded to specific phone numbers.

Cfwd Sel1-8 Caller  Enter the caller number pattern to trigger the Call Forward Selective (1-8) feature.

Cfwd Sel1-8 Dest  Enter the forward number for the Call Forward Selective (1-8) feature.

Cfwd Last Caller  Enter the caller number that is actively forwarded to the Cfwd Last Dest number when the Call Forward Last activation code is used.

Cfwd Last Dest  Enter the forward number for the Cfwd Last Caller feature.

Block Last Caller  Enter the ID of the caller blocked via the Block Last Caller service.

Accept Last Caller  Enter the ID of the caller accepted via the Accept Last Caller service.

Speed Dial Settings

Speed Dial 2-9  Enter the phone number for each Speed Dial setting.

Supplementary Service Settings

CW Setting  Select whether you want to use the Call Waiting feature for all calls, yes or no. The default is yes.

Block CID Setting  Select whether you want to block Caller ID for all calls, yes or no. The default is no.

Block ANC Setting  Select whether you want to block anonymous calls, yes or no. The default is no.

DND Setting  Select whether you want to use the Do Not Disturb (DND) feature, yes or no. The default is no.

CID Setting  Select whether you want to enable Caller ID generation, yes or no. The default is yes.

CWCID Setting  Select whether you want to enable Caller ID for Call Waiting, yes or no. The default is yes.
Dist Ring Setting  Select whether you want to use the Distinctive Ring feature, yes or no. The default is yes.

Message Waiting  Select whether you want to use the Message Waiting feature, yes or no. The default is no.

Distinctive Ring Settings

Ring1-8 Caller  Enter the caller number pattern to play Distinctive Ring/Call Waiting Tone (1-8).

Ring Settings

Default Ring  Select the default ringing pattern for all callers. The default is 1.

Default CWT  Select the default CWT pattern for all callers. The default is 1.

Hold Reminder Ring  Select the ring pattern that will remind you of a call on hold when the phone is on-hook. The default is 8.

Call Back Ring  Select the ring pattern for call back notification. The default is 7.

Cfwd Ring Splash Len  Enter the duration of the ring splash when a call is forwarded. The range is 0 to 10.0 seconds. The default is 0.

Cblk Ring Splash Len  Enter the duration of the ring splash when a call is blocked. The range is 0 to 10.0 seconds. The default is 0.

VMWI Ring Splash Len  Enter the duration of the ring splash when new messages arrive before the VoiceMail Waiting Indication (VMWI) signal is applied. The range is 0 to 10.0 seconds. The default is 0.

Click Save Settings to apply your changes, or click Cancel Changes to cancel your changes.

Voice > Admin Login

The Admin Login allows access to more advanced settings. To access administrative screens, click Admin Login, and enter the user name and password provided by your service provider. Contact your service provider for more information. (The factory default Admin Login name and password are admin.)

NOTE: In most cases, you do not need to use the administrative screens. Contact your service provider for more information.
Chapter 4: Interactive Voice Response Menu

Overview

This chapter explains how to use the Interactive Voice Response (IVR) Menu to configure the Router’s network settings. Use your telephone’s keypad to enter your commands and select choices, and the Router will use voice responses.

To access the IVR Menu:

1. Use a telephone connected to the Phone 1 or 2 port of the Router. (You can only access the IVR Menu through an analog telephone, not any of the Internet phones.)
2. Press **** (in other words, press the star key four times).
3. Wait until you hear the Router’s response, “Configuration menu. Please enter the option followed by the # (pound) key, or hang up to exit”.

Menu Commands

Refer to the following table that lists actions, commands, menu choices, and descriptions. After you select an option, press the # (pound) key. To exit the menu, hang up the telephone.

If the menu is inactive for more than one minute, the Router will time out. To re-enter the menu, press ****.

<table>
<thead>
<tr>
<th>Action</th>
<th>Command</th>
<th>Choices</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Enter IVR Menu</td>
<td>****</td>
<td></td>
<td>Use this command to enter the IVR Menu. Ignore Special Information Tones (SITs) or other tones until you hear, “Configuration menu. Please enter the option followed by the # (pound) key, or hang up to exit.”</td>
</tr>
<tr>
<td>Check DHCP</td>
<td>100</td>
<td></td>
<td>The IVR announces whether DHCP is enabled or disabled.</td>
</tr>
<tr>
<td>Check IP Address</td>
<td>110</td>
<td></td>
<td>The IVR announces the current IP address of the Router.</td>
</tr>
<tr>
<td>Check Subnet Mask</td>
<td>120</td>
<td></td>
<td>The IVR announces the current subnet mask of the Router.</td>

<td>The IVR announces the version number of the firmware running on the Router.</td>
</tr>
<tr>
<td>Voice Factory Reset of the Router</td>
<td>73738</td>
<td>Confirm - Press 1. Cancel - Press * (star).</td>
<td>After the Router requests confirmation, press 1 to confirm. After you hear, “Option successful”, hang up the phone. All voice settings will be reset to their defaults.</td>
</tr>
</tbody>
</table>
Appendix A: Troubleshooting

Your computer cannot connect to the Internet.

Follow these instructions until your computer can connect to the Internet:

- Make sure that the Router is powered on. The Power LED should be green and not flashing.
- If the Power LED is flashing, then power off all of your network devices, including the modem, Router, and computers. Wait 30 seconds. Then power on each device in the following order:
  1. Cable or DSL modem
  2. Router
  3. Computer
- Check the cable connections. The computer should be connected to one of the ports numbered 1-4 on the Router, and the modem must be connected to the Internet port on the Router.

You do not hear a dial tone, and the Phone 1 or 2 LED is not lit.

Follow these instructions until your problem is solved:

- Make sure the telephone is plugged into the appropriate port, Phone 1 or 2.
- Disconnect and re-connect the RJ-11 telephone cable between the Router and telephone.
- Make sure your telephone is set to its tone setting (not pulse).
- Make sure your network has an active Internet connection. Try to access the Internet, and check to see if the Router's Internet LED is lit. If you do not have a connection, then power off all of your network devices, including the modem, Router, and computers. Wait 30 seconds. Then power on each device in the following order:
  1. Cable or DSL modem
  2. Router
  3. Computers and other devices
- Verify your account information and confirm that the phone line is registered with your Internet Telephony Service Provider (ITSP).

When you are on an Internet phone call, words are dropped intermittently.

Follow these instructions until your problem is solved:

- If you are using the Router’s wireless function and a cordless phone, they may be using the same frequency and may interfere with each other. Move the cordless phone farther away from the Router.
- There may be heavy network activity, particularly if you are running a server or using a file sharing program. Try to limit network or Internet activity during Internet phone calls. For example, if you are running a file sharing program, files may be uploaded in the background even though you are not downloading any files, so make sure you exit the program before making Internet phone calls.
- There may not be enough bandwidth available for your Internet phone call. You may want to test your bandwidth using one of the bandwidth tests available online. If necessary, access your Internet phone service account and reduce the bandwidth requirements for your service. For more information, refer to the website of your ITSP.

The modem does not have an Ethernet port.

The modem is a dial-up modem for traditional dial-up service. To use the Router, you need a cable/DSL modem and high-speed Internet connection.

You cannot use the DSL service to connect manually to the Internet.

After you have installed the Router, it will automatically connect to your Internet Service Provider (ISP) or Internet Telephony Service Provider (ITSP), so you no longer need to connect manually.

The DSL telephone line does not fit into the Router’s Internet port.

The Router does not replace your modem. You still need your DSL modem in order to use the Router. Connect the telephone line to the DSL modem, insert the setup CD into your computer, and then follow the on-screen instructions.
When you double-click the web browser, you are prompted for a username and password. If you want to get rid of the prompt, follow these instructions.

Launch the web browser and perform the following steps (these steps are specific to Internet Explorer but are similar for other browsers):

1. Select **Tools > Internet Options**.
2. Click the **Connections** tab.
3. Select **Never dial a connection**.
4. Click **OK**.

The Router does not have a coaxial port for the cable connection.

The Router does not replace your modem. You still need your cable modem in order to use the Router. Connect your cable connection to the cable modem, insert the setup CD into your computer, and then follow the on-screen instructions.

The computer cannot connect wirelessly to the network.

Make sure the wireless network name or SSID is the same on both the computer and the Router. If you have enabled wireless security, then make sure the same security method and key are used by both the computer and the Router.

You need to modify the settings on the Router.

To access the web-based utility, follow these instructions:

1. Launch the web browser on your computer, and enter the Router’s default IP address, **192.168.15.1**, in the Address field. Then press Enter.

   **NOTE:** If you place the Router behind a primary router with the IP address of 192.168.15.1, then the Router will automatically assume a new default IP address, **192.168.16.1**.

2. A login screen appears. The first time you open the web-based utility, use the default user name and password, admin. (You can set a new password from the Administration tab’s Management screen.) Then click OK.
3. Click the appropriate tab to change the settings.

You cannot configure the settings for the second wireless network because the SSID2 settings are grayed out.

Your service provider may control the settings for the second wireless network (SSID2); contact your service provider for more information.

WEB: If your questions are not addressed here, refer to the Linksys website, [www.linksys.com](http://www.linksys.com).
Appendix B:
Specifications

Model: WRP400

* Note: Many specifications are programmable within a defined range or list of options. Please see the SPA ATA Administration Guide for details. The target configuration profile is uploaded to the WRP400 at the time of provisioning.

Data Networking:
- MAC Address (IEEE 802.3)
- IPv4 - Internet Protocol v4 (RFC 791) Upgradeable to v6 (RFC 1883)
- ARP - Address Resolution Protocol
- DNS - A Record (RFC 1706), SRV Record (RFC 2782)
- DHCP Client - Dynamic Host Configuration Protocol (RFC 2131)
- DHCP Server - Dynamic Host Configuration Protocol (RFC 2131)
- PPPoE Client - Point to Point Protocol over Ethernet (RFC 2516)
- ICMP - Internet Control Message Protocol (RFC 792)
- TCP - Transmission Control Protocol (RFC 793)
- UDP - User Datagram Protocol (RFC 768)
- RTP - Real Time Protocol (RFC 1889) (RFC 1890)
- RTCP - Real Time Control Protocol (RFC 1889)
- TFTP
- RTSP
- HTTP
- NAT (RFC 1631)
- Reverse NAT
- SDP
- SNTP - Simple Network Time Protocol (RFC 2030)
- Type of Service - TOS (RFC 791/1349)
- QoS - Packet Prioritization by Type
- Router or Bridge Mode of Operation
- MAC Address Cloning
- Port Forwarding

Voice Features:
- Voice Algorithms
  - G.711 (a-law and µ-law)
  - G.726 (16/24/32/40 kbps)
  - G.729 AB
  - G.723.1 (6.3 kbps, 5.3 kbps)
- Call Forwarding:
  - No Answer/Busy/Unconditional
- Support for Two Simultaneous Calls
- SIP TLS (Transport Layer Security)
- Call Transfer
- Call Waiting/Hold/Retrieve
- Three-way Conferencing
- Call ID Number & Name (Primary Line & On Call Waiting)
- Call-ID Block (Prevent Send out the Caller ID)
- Anonymous Call Blocking
- Distinctive Ringing
- Do not Disturb Setting
- Repeat Dailing on Busy
- Call Return
- Emergency Call Support
- Dial Plan
- Speed Dial
- Auto-Attendant
- Multi-Room Meet-Me Conference
- In-Band/ SIP-INFO DTMF Translation

Provisioning, Administration, & Maintenance:
- Web Browser Administration & Configuration via Integral Web Server
- Telephone Key Pad Configuration with Interactive Voice Prompts
- Automated Provisioning & Upgrade via HTTP, TFTP, HTTPS
- Asynchronous Notification of Upgrade Availability via NOTIFY
- Non-Intrusive, In-Service Upgrades
- Report Generation & Event Logging
- Stats in BYE Message
- Syslog & Debug Server Records
- Per Line and Purpose Configurable Syslog and Debug Options

Appendix C: Warranty Information

Limited Warranty

Linksys warrants this Linksys hardware product against defects in materials and workmanship under normal use for the Warranty Period, which begins on the date of purchase by the original end-user purchaser and lasts for the period specified below:

- One (1) year for new product
- Ninety (90) days for refurbished product

This limited warranty is non-transferable and extends only to the original end-user purchaser. Your exclusive remedy and Linksys’ entire liability under this limited warranty will be for Linksys, at its option, to (a) repair the product with new or refurbished parts, (b) replace the product with a reasonably available equivalent new or refurbished Linksys product, or (c) refund the purchase price of the product less any rebate. Any repaired or replacement products will be warranted for the remainder of the original Warranty Period or thirty (30) days, whichever is longer. All products and parts that are replaced become the property of Linksys.

Exclusions and Limitations

This limited warranty does not apply if: (a) the product assembly seal has been removed or damaged, (b) the product has been altered or modified, except by Linksys, (c) the product damage was caused by use with non-Linksys products, (d) the product has not been installed, operated, repaired, or maintained in accordance with instructions supplied by Linksys, (e) the product has been subjected to abnormal physical or electrical stress, misuse, negligence, or accident, (f) the serial number on the Product has been altered, defaced, or removed, or (g) the product is supplied or licensed for beta, evaluation, testing or demonstration purposes for which Linksys does not charge a purchase price or license fee.

ALL SOFTWARE PROVIDED BY LINKSYS WITH THE PRODUCT, WHETHER FACTORY LOADED ON THE PRODUCT OR CONTAINED ON MEDIA ACCOMPANYING THE PRODUCT, IS PROVIDED “AS IS” WITHOUT WARRANTY OF ANY KIND. Without limiting the foregoing, Linksys does not warrant that the operation of the product or software will be uninterrupted or error free. Also, due to the continual development of new techniques for intruding upon and attacking networks, Linksys does not warrant that the product, software or any equipment, system or network on which the product or software is used will be free of vulnerability to intrusion or attack. The product may include or be bundled with third party software or service offerings. This limited warranty shall not apply to such third party software or service offerings. This limited warranty does not guarantee any continued availability of a third party’s service for which this product’s use or operation may require.

TO THE EXTENT NOT PROHIBITED BY LAW, ALL IMPLIED WARRANTIES AND CONDITIONS OF MERCHANTABILITY, SATISFACTORY QUALITY OR FITNESS FOR A PARTICULAR PURPOSE ARE LIMITED TO THE DURATION OF THE WARRANTY PERIOD. ALL OTHER EXPRESS OR IMPLIED CONDITIONS, REPRESENTATIONS AND WARRANTIES, INCLUDING, BUT NOT LIMITED TO, ANY IMPLIED WARRANTY OF NON-INFRINGEMENT, ARE DISCLAIMED. Some jurisdictions do not allow limitations on how long an implied warranty lasts, so the above limitation may not apply to you. This limited warranty gives you specific legal rights, and you may also have other rights which vary by jurisdiction.

TO THE EXTENT NOT PROHIBITED BY LAW, IN NO EVENT WILL LINKSYS BE LIABLE FOR ANY LOST DATA, REVENUE OR PROFIT, OR FOR SPECIAL, INDIRECT, CONSEQUENTIAL, INCIDENTAL OR PUNITIVE DAMAGES, REGARDLESS OF THE THEORY OF LIABILITY (INCLUDING NEGLIGENCE), ARISING OUT OF OR RELATED TO THE USE OF OR INABILITY TO USE THE PRODUCT (INCLUDING ANY SOFTWARE), EVEN IF LINKSYS HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. IN NO EVENT WILL LINKSYS’ LIABILITY EXCEED THE AMOUNT PAID BY YOU FOR THE PRODUCT. The foregoing limitations will apply even if any warranty or remedy provided under this limited warranty fails of its essential purpose. Some jurisdictions do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you.

Obtaining Warranty Service

If you have any questions about the services provided by your Service Provider or your Linksys product, please contact your Service Provider that provided the Linksys product to you. You also will find a variety of online support tools and information to assist you with your product at www.linksys.com/support. If the product proves defective during the Warranty Period, contact your Service Provider for instructions on how to obtain warranty service. The telephone number for your Service Provider in your area can be found in the written documentation included with your Linksys product.

Have your product serial number and proof of purchase (if applicable) on hand when calling your Service Provider. If you are requested to return your product, you will be given a Return Materials Authorization (RMA) number and instructions for shipping the product to your Service Provider. You are responsible for properly packaging and shipping your product at your cost and risk. You must include the RMA number and a copy of your dated proof
Appendix C

Warranty Information

of original purchase (if applicable) when returning your product. Products received without a RMA number and dated proof of original purchase (if applicable) will be rejected. Do not include any other items with the product you are returning. Defective product covered by this limited warranty will be repaired or replaced and returned to you without charge. Customers outside of the United States of America and Canada are responsible for all shipping and handling charges, custom duties, VAT and other associated taxes and charges. Repairs or replacements for your product not covered under this limited warranty will be subject to charge at Linksys’ then-current rates.

Technical Support

This limited warranty is neither a service nor a support contract. Information about Linksys’ current technical support offerings and policies (including any fees for support services) can be found at www.linksys.com/support.

This limited warranty is governed by the laws of the jurisdiction in which the Linksys product was purchased by you.

Please direct all inquiries to: Linksys, P.O. Box 18558, Irvine, CA 92623
Appendix D: Regulatory Information

FCC Statement

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This product has been tested and complies with the specifications for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used according to the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which is found by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna
- Increase the separation between the equipment or devices
- Connect the equipment to an outlet other than the receiver’s
- Consult a dealer or an experienced radio/TV technician for assistance

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate this equipment.

FCC Radiation Exposure Statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.

This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter. IEEE 802.11b or 802.11g operation of this product in the USA is firmware-limited to channels 1 through 11.

Safety Notices and Information

- Caution: To reduce the risk of fire, use only No.26 AWG or larger telecommunication line cord.
- Do not use this product near water, for example, in a wet basement or near a swimming pool.
- Avoid using this product during an electrical storm. There may be a remote risk of electric shock from lightning.

WARNING: This product contains lead, known to the State of California to cause cancer, and birth defects or other reproductive harm. Wash hands after handling.

WARNING: This equipment will be inoperative when main power fails.

WARNING: Many Internet phone service providers do not support calls to emergency service numbers (000 in Australia or 111 in New Zealand). An alternative phone should be used to make emergency calls.

WARNING: To ensure compliance with exposure limits to radiofrequency fields, the antenna of the WRP400 should be no closer than 20 cm from the body during use.

Industry Canada Statement

This Class B digital apparatus complies with Canadian ICES-003 and RSS210.

Operation is subject to the following two conditions:

1. This device may not cause interference and
2. This device must accept any interference, including interference that may cause undesired operation of the device.

To reduce potential radio interference to other users, the antenna type and its gain should be so chosen that the EIRP is not more than required for successful communication.

Industry Canada Radiation Exposure Statement

This equipment complies with IC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.

This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
Appendix D

Regulatory Information

Avis d’Industrie Canada

Cet appareil numérique de la classe B est conforme aux normes NMB-003 et RSS210 du Canada.

L'utilisation de ce dispositif est autorisée seulement aux conditions suivantes :

1. il ne doit pas produire de brouillage et
2. il doit accepter tout brouillage radioélectrique reçu, même si ce brouillage est susceptible de compromettre le fonctionnement du dispositif.

Afin de réduire le risque d'interférence aux autres utilisateurs, le type d'antenne et son gain doivent être choisis de façon à ce que la puissance isotrope rayonnée équivalente (p.i.r.e.) ne soit pas supérieure au niveau requis pour obtenir une communication satisfaisante.

Avis de non-responsabilité concernant les appareils sans fil

Les performances maximales pour les réseaux sans fil sont tirées des spécifications de la norme IEEE 802.11. Les performances réelles peuvent varier, notamment en fonction de la capacité du réseau sans fil, du débit de la transmission de données, de la portée et de la couverture. Les performances dépendent de facteurs, conditions et variables multiples, en particulier de la distance par rapport au point d'accès, du volume du trafic réseau, des matériaux utilisés dans le bâtiment et du type de construction, du système d'exploitation et de la combinaison de produits sans fil utilisés, des interférences et de toute autre condition défavorable.

Avis d’Industrie Canada concernant l'exposition aux radiofréquences :

Ce matériel est conforme aux limites établies par IC en matière d'exposition aux radiofréquences dans un environnement non contrôlé. Ce matériel doit être installé et utilisé à une distance d'au moins 20 cm entre l'antenne et le corps de l'utilisateur.

L'émetteur ne doit pas être placé près d'une autre antenne ou d'un autre émetteur, ou fonctionner avec une autre antenne ou un autre émetteur.

Telepermit Statement

The cabling between the phone port and the phone shall not exceed 100 metres.

Wireless Disclaimer

The maximum performance for wireless is derived from IEEE Standard 802.11 specifications. Actual performance can vary, including lower wireless network capacity, data throughput rate, range and coverage. Performance depends on many factors, conditions and variables, including distance from the access point, volume of network traffic, building materials and construction, operating system used, mix of wireless products used, interference and other adverse conditions.
## Declaration of Conformity with Regard to EU Directive 1999/5/EC (R&TTE Directive)

Compliance Information for 2.4-GHz and 5-GHz Wireless Products Relevant to the EU and Other Countries Following the EU Directive 1999/5/EC (R&TTE Directive)

### Declaration of Conformity

For all products, the Declaration of Conformity (DoC) is available through one or more of these options:

- A pdf file is included on the product’s CD.
- A print copy is included with the product.
- A pdf file is available on the product’s webpage.
- Visit [www.linksys.com/international](http://www.linksys.com/international) and select your country or region. Then select your product.
- If you need any other technical documentation, see the “Technical Documents on www.linksys.com/international” section, as shown later in this appendix.

</tr>
</tbody>
</table>
The following standards were applied during the assessment of the product against the requirements of the Directive 1999/5/EC:

- Radio: EN 300 328 and/or EN 301 893 as applicable
- EMC: EN 301 489-1, EN 301 489-17
- Safety: EN 60950 and either EN 50385 or EN 50371

Dynamic Frequency Selection (DFS) and Transmit Power Control (TPC) are required for operation in the 5 GHz band.

DFS: The equipment meets the DFS requirements as defined in ETSI EN 301 893. This feature is required by the regulations to avoid interference with Radio Location Services (radars).

TPC: For operation in the 5 GHz band, the maximum power level is 3 dB or more below the applicable limit. As such, TPC is not required.

### CE Marking

For the Linksys Wireless-N, -G, -B, and/or -A products, the following CE mark, notified body number (where applicable), and class 2 identifier are added to the equipment.

- ![CE 0560](image)
- ![CE 0678](image)
- ![CE 0336](image)

Check the CE label on the product to find out which notified body was involved during the assessment.

### National Restrictions

This product may be used in all EU countries (and other countries following the EU directive 1999/5/EC) without any limitation except for the countries mentioned below:

*Ce produit peut être utilisé dans tous les pays de l’UE (et dans tous les pays ayant transposés la directive 1999/5/CE) sans aucune limitation, excepté pour les pays mentionnés ci-dessous:*

*Questo prodotto è utilizzabile in tutte i paesi EU (ed in tutti gli altri paesi che seguono le direttive EU 1999/5/EC) senza nessuna limitazione, eccetto per i paesi menzionati di seguito:*

*Das Produkt kann in allen EU Staaten ohne Einschränkungen eingesetzt werden (sowie in anderen Staaten die der EU Direktive 1999/5/CE folgen) mit Aufnahme der folgenden aufgeführten Staaten:*

In the majority of the EU and other European countries, the 2.4- and 5-GHz bands have been made available for the use of wireless local area networks (LANs). The table labeled “Overview of Regulatory Requirements for Wireless LANs” provides an overview of the regulatory requirements applicable for the 2.4- and 5-GHz bands.

Later in this document you will find an overview of countries in which additional restrictions or requirements or both are applicable.

The requirements for any country may evolve. Linksys recommends that you check with the local authorities for the latest status of their national regulations for both the 2.4- and 5-GHz wireless LANs.

†Dynamic Frequency Selection and Transmit Power Control are required in the frequency ranges of 5250-5350 MHz and 5470-5725 MHz.

The following countries have restrictions and/or requirements in addition to those given in the table labeled “Overview of Regulatory Requirements for Wireless LANs”:

### Denmark

In Denmark, the band 5150 - 5350 MHz is also allowed for outdoor usage.

*I Danmark må frekvensbåndet 5150 - 5350 også anvendes udendørs.*
France

For 2,4 GHz, the product should not be used outdoors in the band 2454 - 2483.5 MHz. There are no restrictions when used in other parts of the 2,4 GHz band when used indoors. Check http://www.arcep.fr/ for more details.

Pour la bande 2,4 GHz, l’équipement ne doit pas être utilisé en extérieur dans la bande 2454 -2483,5 MHz. Il n’y a pas de restrictions pour des utilisations en intérieur dans d’autres parties de la bande 2,4 GHz. Consultez http://www.arcep.fr/pour de plus amples détails.

Italy

This product meets the National Radio Interface and the requirements specified in the National Frequency Allocation Table for Italy. Unless this 2,4-GHz wireless LAN product is operating within the boundaries of the owner’s property, its use requires a “general authorization”. Please check http://www.comunicazioni.it/it/ for more details.

Latvia

The outdoor usage of the 2,4 GHz band requires an authorization from the Electronic Communications Office. Please check http://www.esd.lv for more details.

Notes:

1. Although Norway, Switzerland and Liechtenstein are not EU member states, the EU Directive 1999/5/EC has also been implemented in those countries.
2. The regulatory limits for maximum output power are specified in EIRP. The EIRP level of a device can be calculated by adding the gain of the antenna used (specified in dBi) to the output power available at the connector (specified in dBm).

Product Usage Restrictions

This product is designed for indoor usage only. Outdoor usage is not recommended, unless otherwise noted.

2,4 GHz Restrictions

This product is designed for use with the standard, integral or dedicated (external) antenna(s) that is/are shipped together with the equipment. However, some applications may require the antenna(s), if removable, to be separated from the product and installed remotely from the device by using extension cables. For these applications, Linksys offers an R-SMA extension cable (AC9SMA) and an R-TNC extension cable (AC9TNC). Both of these cables are 9 meters long and have a cable loss (attenuation) of 5 dB. To compensate for the attenuation, Linksys also offers higher gain antennas, the HGA7S (with R-SMA connector) and HGA7T (with R-TNC connector). These antennas have a gain of 7 dBi and may only be used with either the R-SMA or R-TNC extension cable.

Combinations of extension cables and antennas resulting in a radiated power level exceeding 100 mW EIRP are illegal.

Third-Party Software or Firmware

The use of software or firmware not supported/provided by Linksys may result that the equipment is no longer compliant with the regulatory requirements.

Technical Documents on www.linksys.com/international

Follow these steps to access technical documents:

1. Enter http://www.linksys.com/international in your web browser.
2. Select the country or region in which you live.
3. Click the Products tab.
4. Select the appropriate product category.
5. Select the product sub-category, if necessary.
6. Select the product.
7. Select the type of documentation you want from the More Information section. The document will open in PDF format if you have Adobe Acrobat installed on your computer.

NOTE: If you have questions regarding the compliance of this product or you cannot find the information you need, please contact your local sales office or visit www.linksys.com/international
User Information for Consumer Products
Covered by EU Directive 2002/96/EC on
Waste Electric and Electronic Equipment
(WEEE)

This document contains important information for users with regards to the proper disposal and recycling of Linksys products. Consumers are required to comply with this notice for all electronic products bearing the following symbol:

---

English - Environmental Information for Customers in the European Union

European Directive 2002/96/EC requires that the equipment bearing this symbol \[\text{symbol}\] on the product and/or its packaging must not be disposed of with unsorted municipal waste. The symbol indicates that this product should be disposed of separately from regular household waste streams. It is your responsibility to dispose of this and other electric and electronic equipment via designated collection facilities appointed by the government or local authorities. Correct disposal and recycling will help prevent potential negative consequences to the environment and human health. For more detailed information about the disposal of your old equipment, please contact your local authorities, waste disposal service, or the shop where you purchased the product.

---

Bulgarian - Информация относно опазването на околната среда за потребители в Европейския съюз

Европейска директива 2002/96/EC изисква уредите, носящи този символ \[\text{symbol}\] върху изделието и/или опаковката му, да не се изхвърлят с несортирани битови отпадъци. Символът обозначава, че изделието трябва да се изхвърля отделно от смешването на обикновените битови отпадъци. Вашата еготворността този и другите електрически и електронни уреди да се изхвърлят в предварително определени от държавните или общински органи специализирани пунктове за събиране. Правилното изхвърляне и рециклиране ще ви помогнат да се предотвратят евентуални вредни за околната среда и здравето на населението последствия. За по-дълбока информация относно изхвърлянето на вашите стари уреди се обрнете към местните власти, службите за смешване или магазина, от който сте закупили уреда.

---

Čeština (Czech) - Informace o ochraně životního prostředí pro zákazníky v zemích Evropské unie

Evropská směrnice 2002/96/ES zakazuje, aby zařízení označené tímto symbolem \[\text{symbol}\] na produktu anebo na obalu bylo likvidováno s netříděným komunálním odpadem. Tento symbol udává, že daný produkt musí být likvidován odděleně od běžného komunálního odpadu. Odpovídáte za likvidaci tohoto produktu a dalších elektrických a elektronických zařízení prostřednictvím určených sběrných míst stanovených vládou nebo místními úřady. Správná likvidace a recyklace pomáhá předcházet potenciálním negativním dopadům na životní prostředí a lidské zdraví. Podrobnější informace o likvidaci starého vybavení si laskavě vyžádejte od místních úřadů, podniku zabývajícího se likvidací komunálních odpadů nebo obchodu, kde jste produkt zakoupili.

Regulatory Information

Eesti (Estonian) - Keskkonnaalane informatsioon
Euroopa Liidus asuvatele klientidele

Español (Spanish) - Información medioambiental para clientes de la Unión Europea

La Directiva 2002/96/CE de la UE exige que los equipos que llven este símbolo ε en el propio aparato y/o en su embalaje no deben eliminarse junto con otros residuos urbanos no seleccionados. El símbolo indica que el producto en cuestión debe separarse de los residuos domésticos convencionales con vistas a su eliminación. Es responsabilidad suya desechar este y cualesquiera otros aparatos eléctricos y electrónicos a través de los puntos de recogida que ponen a su disposición el gobierno y las autoridades locales. Al desechar y reciclar correctamente estos aparatos estará contribuyendo a evitar posibles consecuencias negativas para el medio ambiente y la salud de las personas. Si desea obtener información más detallada sobre la eliminación segura de su aparato usado, consulte a las autoridades locales, al servicio de recogida y eliminación de residuos de su zona o pregunte en la tienda donde adquirió el producto.

Ελληνικά (Greek) - Στοιχεία περιβαλλοντικής προστασίας για πελάτες εντός της Ευρωπαϊκής Ένωσης

Η Κοινοτική Οδηγία 2002/96/EC απαιτεί ότι ο εξοπλισμός οποιοσδήποτε φέρει αυτό το σύμβολο ε στο προϊόν και/ή στη συσκευασία του δεν πρέπει να απορρίπτεται μαζί με τα μικτά κοινοτικά απορρίμματα. Το σύμβολο υποδεικνύει ότι αυτό το προϊόν θα πρέπει να απορρίπτεται ξεχωριστά από τα συνήθη οικιακά απορρίμματα. Είστε υπεύθυνος για την απόρριψη του παρόντος και άλλου ηλεκτρικού και ηλεκτρονικού εξοπλισμού μέσω των καθορισμένων εγκαταστάσεων συγκέντρωσης απορριμμάτων, οι οποίες παρέχονται από το κράτος ή τις αμυδίδες τοπικές αρχές. Η σωστή απόρριψη και ανακύκλωση συμβάλλει στην πρόληψη οποίων ενδεχομένως σκοπούν να επικρατήσουν συγκέντρωσης απορριμμάτων οι οποίες παρέχονται από το κράτος ή τις αμυδίδες τοπικές αρχές. Η σωστή απόρριψη και ανακύκλωση συμβάλλει στην πρόληψη οποίων αντικαταστάσεων οι οποίες παρέχονται από το κράτος ή τις αμυδίδες τοπικές αρχές. Σε περιπτώσεις πληροφοριών σχετικά με την απόρριψη του παλαιού σας εξοπλισμού, παρακαλούμε επικοινωνήστε με τις τοπικές αρχές, τις υπηρεσίες απόρριψης ή το κατάστημα από το οποίο αγοράσατε το προϊόν.

Français (French) - Informations environnementales pour les clients de l’Union européenne

La directive européenne 2002/96/CE exige que l’équipement sur lequel est apposé ce symbole ε sur le produit et/ou son emballage ne soit pas jeté avec les autres ordures ménagères. Ce symbole indique que le produit doit être éliminé dans un circuit distinct de celui pour les déchets des ménages. Il est de votre responsabilité de jeter ce matériau ainsi que tout autre matériau électrique ou électronique par les moyens de collecte indiqués par le gouvernement et les pouvoirs publics des collectivités territoriales. L’élimination et le recyclage en bonne et due forme ont pour but de lutter contre l’impact néfaste potentiel de ce type de produits sur l’environnement et la santé publique. Pour plus d’informations sur le mode d’élimination de votre ancien équipement, veuillez prendre contact avec les pouvoirs publics locaux, le service de traitement des déchets, ou l’endroit où vous avez acheté le produit.

Italiano (Italian) - Informazioni relative all’ambiente per i clienti residenti nell’Unione Europea

La direttiva europea 2002/96/EC richiede che le apparecchiature contrassegnate con questo simbolo ε sul prodotto e/o sull’imballaggio non siano smaltite insieme ai rifiuti urbani non differenziati. Il simbolo indica che questo prodotto non deve essere smaltito insieme ai normali rifiuti domestici. È responsabilità del proprietario smaltire sia questi prodotti sia le altre apparecchiature elettriche ed elettroniche mediante le specifiche strutture di raccolta indicate dal governo o dagli enti pubblici locali. Il corretto smaltimento ed il riciclaggio aiuteranno a prevenire conseguenze potenzialmente negative per l’ambiente e per la salute dell’essere umano. Per ricevere informazioni più dettagliate circa lo smaltimento delle vecchie apparecchiature in Vostro possesso, Vi invitiamo a contattare gli enti pubblici di competenza, il servizio di smaltimento rifiuti o il negozio nel quale avete acquistato il prodotto.

Appendix D  Regulatory Information

Português (Portuguese) - Informação ambiental para clientes da União Europeia
A Directiva Europeia 2002/96/CE exige que o equipamento que exibe este símbolo não no produto e/ou na sua embalagem não seja eliminado junto com os resíduos municipais não separados. O símbolo indica que este produto deve ser eliminado separadamente dos resíduos domésticos regulares. É da sua responsabilidade eliminar este e qualquer outro equipamento eletrônico e eletrónico através das instalações de recolha designadas pelas autoridades governamentais ou locais. A eliminação e reciclagem correctas ajudarão a prevenir as consequências negativas para o ambiente e para a saúde humana. Para obter informações mais detalhadas sobre a forma de eliminar o seu equipamento antigo, contacte as autoridades locais, os serviços de eliminação de resíduos ou o estabelecimento comercial onde adquiriu o produto.

Română (Romanian) - Informaţii de mediu pentru clienţi din Uniunea Europeană

Slovenčina (Slovak) - Informácie o ochrane životného prostredia pre zákazníkov v Európskej unii
Podľa európskej smernice 2002/96/ES zariadenie s týmto symbolom na produkte a/alebo jeho balení nesmie byť likvidované spolu s netriedeným komunálnym odpadom. Symbol znamená, že produkt by sa mal likvidovať oddelene od bežného odpadu z domácnosti. Je vašou povinnosťou likvidovať toto i ostatné elektrické a elektronické zariadenia prostredníctvom specializovaných zbierňich zariadení určených všadu alebo miestnymi orgánmi. Správna likvidácia a recykácia pomôže zabrániť prípadnym negatívnym dopadom na životné prostredie a zdravie ľudí. Ak máte záujem o podrobnejšie informácie o likvidácii starého zariadenia, obrátte sa, prosím, na miestne orgány, organizácie zaobierajúce sa likvidáciou odpadov alebo obchod, v ktorom ste si produkt zakúpili.

Appendix E: Software License Agreement

Software in Linksys Products

This product from Cisco-Linksys LLC or from one of its affiliates Cisco Systems-Linksys (Asia) Pte Ltd. or Cisco-Linksys K.K. (“Linksys”) contains software (including firmware) originating from Linksys and its suppliers and may also contain software from the open source community. Any software originating from Linksys and its suppliers is licensed under the Linksys Software License Agreement contained at Schedule 1 below. You may also be prompted to review and accept that Linksys Software License Agreement upon installation of the software.

Any software from the open source community is licensed under the specific license terms applicable to that software made available by Linksys at [www.linksys.com/gpl](http://www.linksys.com/gpl) or as provided for in Schedules 2 and 3 below.

Where such specific license terms entitle you to the source code of such software, that source code is upon request available at cost from Linksys for at least three years from the purchase date of this product and may also be available for download from [www.linksys.com/gpl](http://www.linksys.com/gpl). For detailed license terms and additional information on open source software in Linksys products please look at the Linksys public web site at: [www.linksys.com/gpl](http://www.linksys.com/gpl) or Schedule 2 below as applicable.

**BY DOWNLOADING OR INSTALLING THE SOFTWARE, OR USING THE PRODUCT CONTAINING THE SOFTWARE, YOU ARE CONSENTING TO BE BOUND BY THE SOFTWARE LICENSE AGREEMENTS BELOW. IF YOU DO NOT AGREE TO ALL OF THESE TERMS, THEN YOU MAY NOT DOWNLOAD, INSTALL OR USE THE SOFTWARE. YOU MAY RETURN UNUSED SOFTWARE (OR, IF THE SOFTWARE IS SUPPLIED AS PART OF ANOTHER PRODUCT, THE UNUSED PRODUCT) FOR A FULL REFUND UP TO 30 DAYS AFTER ORIGINAL PURCHASE, SUBJECT TO THE RETURN PROCESS AND POLICIES OF THE PARTY FROM WHICH YOU PURCHASED SUCH PRODUCT OR SOFTWARE.**

**License.** Subject to the terms and conditions of this Agreement, Linksys grants the original end user purchaser of the Linksys product containing the Software (“You”) a nonexclusive license to use the Software solely as embedded in or (where authorized in the applicable documentation) for communication with such product. This license may not be sublicensed, and is not transferable except to a person or entity to which you transfer ownership of the complete Linksys product containing the Software, provided you permanently transfer all rights under this Agreement and do not retain any full or partial copies of the Software, and the recipient agrees to the terms of this Agreement.

“When Software” includes, and this Agreement will apply to (a) the software of Linksys or its suppliers provided in or with the applicable Linksys product, and (b) any upgrades, updates, bug fixes or modified versions (“Upgrades”) or backup copies of the Software supplied to You by Linksys or an authorized reseller, provided you already hold a valid license to the original software and have paid any applicable fee for the Upgrade.

**Protection of Information.** The Software and documentation contain trade secrets and/or copyrighted materials of Linksys or its suppliers. You will not copy or modify the Software or decompile, decrypt, reverse engineer or disassemble the Software (except to the extent expressly permitted by law notwithstanding this provision), and You will not disclose or make available such trade secrets or copyrighted material in any form to any third party. Title to and ownership of the Software and documentation and any portion thereof, will remain solely with Linksys or its suppliers.

**Collection and Processing of Information.** You agree that Linksys and/or its affiliates may, from time to time, collect and process information about your Linksys product and/or the Software and/or your use of either in order (i) to enable Linksys to offer you Upgrades; (ii) to ensure that your Linksys product and/or the Software is being
used in accordance with the terms of this Agreement; (iii) to provide improvements to the way Linksys delivers technology to you and to other Linksys customers; (iv) to enable Linksys to comply with the terms of any agreements it has with any third parties regarding your Linksys product and/or Software and/or (v) to enable Linksys to comply with all applicable laws and/or regulations, or the requirements of any regulatory authority or government agency. Linksys and/or its affiliates may collect and process this information provided that it does not identify you personally. Your use of your Linksys product and/or the Software constitutes this consent by you to Linksys and/or its affiliates’ collection and use of such information and, for EEA customers, to the transfer of such information to a location outside the EEA.

Software Upgrades etc. If the Software enables you to receive Upgrades, you may elect at any time to receive these Upgrades either automatically or manually. If you elect to receive Upgrades manually or you otherwise elect not to receive or be notified of any Upgrades, you may expose your Linksys product and/or the Software to serious security threats and/or some features within your Linksys product and/or Software may become inaccessible. There may be circumstances where we apply an Upgrade automatically in order to comply with changes in legislation, legal or regulatory requirements or as a result of requirements to comply with the terms of any agreements Linksys has with any third parties regarding your Linksys product and/or the Software. You will always be notified of any Upgrades being delivered to you. The terms of this license will apply to any such Upgrade unless the Upgrade in question is accompanied by a separate license, in which event the terms of that license will apply.

Open Source Software. The GPL or other open source code incorporated into the Software and the open source license for such source code are available for free download at http://www.linksys.com/gpl. If You would like a copy of the GPL or other open source code in this Software on a CD, Linksys will mail to You a CD with such code for $9.99 plus the cost of shipping, upon request.

Term and Termination. You may terminate this License at any time by destroying all copies of the Software and documentation. Your rights under this License will terminate immediately without notice from Linksys if You fail to comply with any provision of this Agreement.

Limited Warranty. The warranty terms and period specified in the applicable Linksys Product User Guide shall also apply to the Software.

Disclaimer of Liabilities. IN NO EVENT WILL LINKSYS OR ITS SUPPLIERS BE LIABLE FOR ANY LOST DATA, REVENUE OR PROFIT, OR FOR SPECIAL, INDIRECT, CONSEQUENTIAL, INCIDENTAL OR PUNITIVE DAMAGES, REGARDLESS OF CAUSE (INCLUDING NEGLIGENCE), ARISING OUT OF OR RELATED TO THE USE OF OR INABILITY TO USE THE SOFTWARE, EVEN IF LINKSYS HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. IN NO EVENT WILL LINKSYS’ LIABILITY EXCEED THE AMOUNT PAID BY YOU FOR THE PRODUCT. The foregoing limitations will apply even if any warranty or remedy under this Agreement fails of its essential purpose. Some jurisdictions do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to You.

Export. Software, including technical data, may be subject to U.S. export control laws and regulations and/or export or import regulations in other countries. You agree to comply strictly with all such laws and regulations.

General Terms. This Agreement will be governed by and construed in accordance with the laws of the State of California, without reference to its conflict of laws principles. The United Nations Convention on Contracts for the International Sale of Goods will not apply. If any portion of this Agreement is found to be void or unenforceable, the remaining provisions will remain in full force and effect. This Agreement constitutes the entire agreement between the parties with respect to the Software and supersedes any conflicting or additional terms contained in any purchase order or elsewhere.

END OF SCHEDULE 1

Schedule 2

If this Linksys product contains open source software licensed under Version 2 of the “GNU General Public License” then the license terms below in this Schedule 2 will apply to that open source software. The license terms below in this Schedule 2 are from the public web site at http://www.gnu.org/copyleft/gpl.html

GNU GENERAL PUBLIC LICENSE

Version 2, June 1991

Copyright © 1989, 1991 Free Software Foundation, Inc.
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301, USA

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your
freedom to share and change free software—to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation’s software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Lesser General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author’s protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors’ reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone’s free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The “Program”, below, refers to any such program or work, and a “work based on the Program” means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term “modification”.) Each licensee is addressed as “you”.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program’s source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a. You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.

b. You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.
c. If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage medium does not bring the other work under the scope of this License.

1. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:
   a. Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,
   b. Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,
   c. Accompany it with the information you received as to the offer to distribute corresponding source code.
      (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

   The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

   If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

1. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

2. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

3. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients’ exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.
4. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through that system in reliance on consistent application of that system. The balance of this section is intended to give the author/donor and/or others reasonable assurance that you have received the Program in accordance with this License and any implied warranties.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

1. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

2. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and “any later version”, you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

1. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

1. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM “AS IS” WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

2. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

END OF SCHEDULE 2

Schedule 3

If this Linksys product contains open source software licensed under the OpenSSL license:

This product includes software developed by the OpenSSL Project for use in the OpenSSL Toolkit. (http://www.openssl.org/).

This product includes cryptographic software written by Eric Young (eay@cryptsoft.com).
Appendix E

Software License Agreement

This product includes software written by Tim Hudson (tjh@cryptsoft.com).

In addition, if this Linksys product contains open source software licensed under the OpenSSL license then the license terms below in this Schedule 3 will apply to that open source software. The license terms below in this Schedule 3 are from the public web site at http://www.openssl.org/source/license.html.

The OpenSSL toolkit stays under a dual license, i.e. both the conditions of the OpenSSL License and the original SSLeay license apply to the toolkit. See below for the actual license texts. Actually both licenses are BSD-style Open Source licenses. In case of any license issues related to OpenSSL please contact openssl-core@openssl.org.

OpenSSL License

Copyright © 1998-2007 The OpenSSL Project. All rights reserved.

Redistribution and use in source and binary forms, with or without modification, are permitted provided that the following conditions are met:

1. Redistributions of source code must retain the above copyright notice, this list of conditions and the following disclaimer.
2. Redistributions in binary form must reproduce the above copyright notice, this list of conditions and the following disclaimer in the documentation and/or other materials provided with the distribution.
3. All advertising materials mentioning features or use of this software must display the following acknowledgment: "This product includes software developed by the OpenSSL Project for use in the OpenSSL Toolkit (http://www.openssl.org/)".
4. The names "OpenSSL Toolkit" and "OpenSSL Project" must not be used to endorse or promote products derived from this software without prior written permission. For written permission, please contact openssl-core@openssl.org.
5. Products derived from this software may not be called "OpenSSL" nor may "OpenSSL" appear in their names without prior written permission of the OpenSSL Project.
6. Redistributions of any form whatsoever must retain the following acknowledgment: "This product includes software developed by the OpenSSL Project for use in the OpenSSL Toolkit (http://www.openssl.org/)".

THIS SOFTWARE IS PROVIDED BY THE OpenSSL PROJECT "AS IS" AND ANY EXPRESSED OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE DISCLAIMED. IN NO EVENT SHALL THE OpenSSL PROJECT OR ITS CONTRIBUTORS BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING, BUT NOT LIMITED TO, PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES; LOSS OF USE, DATA, OR PROFITS; OR BUSINESS INTERRUPTION) HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OF THIS SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.

This product includes cryptographic software written by Eric Young (eay@cryptsoft.com). This product includes software written by Tim Hudson (tjh@cryptsoft.com).

Original SSLeay License

Copyright © 1995-1998 Eric Young (eay@cryptsoft.com) All rights reserved.

This package is an SSL implementation written by Eric Young (eay@cryptsoft.com).

The implementation was written so as to conform with Netscapes SSL.

This library is free for commercial and non-commercial use as long as the following conditions are adhered to. The following conditions apply to all code found in this distribution, be it the RC4, RSA, ihash, DES, etc., code; not just the SSL code. The SSL documentation included with this distribution is covered by the same copyright terms except that the holder is Tim Hudson (tjh@cryptsoft.com).

Copyright remains Eric Young’s, and as such any Copyright notices in the code are not to be removed.

If this package is used in a product, Eric Young should be given attribution as the author of the parts of the library used. This can be in the form of a textual message at program startup or in documentation (online or textual) provided with the package.

Redistribution and use in source and binary forms, with or without modification, are permitted provided that the following conditions are met:

1. Redistributions of source code must retain the copyright notice, this list of conditions and the following disclaimer.
2. Redistributions in binary form must reproduce the above copyright notice, this list of conditions and the following disclaimer in the documentation and/or other materials provided with the distribution.
3. All advertising materials mentioning features or use of this software must display the following acknowledgement:
   "This product includes cryptographic software written by Eric Young (eay@cryptsoft.com)"
The word ‘cryptographic’ can be left out if the routines from the library being used are not cryptographic related.

1. If you include any Windows specific code (or a derivative thereof) from the apps directory (application code) you must include an acknowledgement: “This product includes software written by Tim Hudson (tjh@cryptsoft.com)”

THIS SOFTWARE IS PROVIDED BY ERIC YOUNG “AS IS” AND ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE DISCLAIMED. IN NO EVENT SHALL THE AUTHOR OR CONTRIBUTORS BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING, BUT NOT LIMITED TO, PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES; LOSS OF USE, DATA, OR PROFITS; OR BUSINESS INTERRUPTION) HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OF THIS SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.

The license and distribution terms for any publicly available version or derivative of this code cannot be changed. i.e. this code cannot simply be copied and put under another distribution license [including the GNU Public License.]

END OF SCHEDULE 3
