Wireless PrintServer

Conveniently Share a Printer
with Wired and Wireless PCs

Wireless PrintServer
Model No.: WPS11 ver. 3

Now you have the freedom to place a printer practically anywhere on your wireless network.

The EtherFast® Wireless PrintServer provides an easy solution for placing a printer on your wireless network. Don't waste valuable system and network resources or create printing bottlenecks by attaching a printer to one of the nodes on the network. Instead, place a printer anywhere in range of your wireless devices using this convenient device. You will save space and time, and increase your network performance as well.

Hook up a printer to the Wireless PrintServer from anywhere in your workplace and you'll save processing time by freeing your dedicated print server PC and controlling print jobs with its remote management utility. A 256 KB memory buffer handles your graphics jobs effortlessly, while an easy installation gets you printing in just minutes.

Compatible with virtually all printers and major operating systems, your data-intensive print jobs will breeze through with maximized speed and reliability. Let the functionality of the Wireless PrintServer customize your network's capabilities to meet your printing needs time and again.
