

Skype with Handset Convenience!

Get cordless handset convenience when you use Skype! Now when you want to talk to your friends you don't need your computer because the Skype application is pre-loaded on the phone. The Linksys cordless Dual-Mode Internet Telephony Kit with Skype comes with the handset, charger, and a Base Station that plugs into your broadband network and to the standard telephone line plug. Dual-Mode capability lets you choose whether to make calls over a standard telephone line or with Skype. Just select who you want to talk to from your contact list on your handset and get ready to talk.

Of course, the Handset supports SkypeOut dialing as well as your Skype contact list display. It rings when you have a Skype

or SkypeIn or standard telephone call coming in, and shows the caller's ID on the screen. The Handset also supports call waiting and Skype's optional Voicemail service. When you're on a call, you can hit the Mute button for privacy, or use the speakerphone function to let everyone join in.

In short, the Linksys Dual-Mode Cordless Internet Telephony Kit allows you to choose to make calls to other Skype users or over your existing standard telephone line. You'll get the convenience of a cordless phone and all its features, plus the high-quality voice reception integrated right into your Skype handset, no computer is required!

iPhone - More Than Talk. The iPhone family of handheld devices harness the power of the Internet to deliver more than talk.

Connect the base station to your broadband network

Power up your handset and sign in to Skype

Make free call to other Skype users or choose to make calls over your existing standard telephone line
