- Setup CD-ROM with User Guide

User Guide on CD

Quick Installation Guide

Registration Card

1 Connect the Video Camera to a Wired Network for Setup

NOTE: If you want to connect the Camera to a wireless network for setup, refer to the User Guide on the Setup CD-ROM for instructions.

A Connect the included Ethernet network cable to your router or switch.

If you want to connect the Camera directly to your PC, use a crossover Ethernet network cable (not included).

B Connect the other end of the cable to the LAN port on the Camera.

C Connect the included power adapter to the Power port on the Camera.

D Plug the power adapter into an electrical outlet.

The Ready LED flashes while the Camera is initializing. When the Camera is ready for setup, the Ready and LAN LEDs are solidly lit.

G If the Camera requires a static IP address, keep the default setting, Static IP address. If your network has a router or other DHCP server, select Automatic Configuration-DHCP.

Click Next.

If you selected Automatic Configuration-DHCP in step G, then proceed to step I. If you selected Static IP address, the IP Settings screen will appear. Enter an IP Address, Subnet Mask, and Default Gateway appropriate for your network. You must specify an IP Address and Subnet Mask. If you are unsure about the Default Gateway, then leave this field blank. Complete the Primary DNS and/or Secondary DNS fields. Enter at least one DNS address, which you can obtain from your ISP. Click Next.

I Click the Infrastructure radio button if you want the Camera to communicate using an access point or wireless router. Click Next.

Click the Ad-Hoc radio button if you want the Camera to communicate without using an access point or wireless router.

Click Next.

Set up the Wireless-B Internet Video Camera

A Insert the Setup CD-ROM into your CD-ROM drive. The Setup Wizard should run automatically, and the Welcome screen should appear. If it does not, click Start and then Run. In the field provided, enter D:\wvc11b.exe (‘D’ is the letter of your CD-ROM drive).

B Click Setup to begin the setup process.

C Make sure the Camera is correctly connected to your network. Click Next.

D The screen will display a list of Wireless-B Internet Video Cameras on your network and status information. In the Selection box, click the name of the Camera you are currently installing. Click Next.

E A verify password screen will appear. In lowercase letters, enter admin in the Administrator Name and Password fields. Click OK.

F On the Basic Settings screen, enter a unique name for the Camera in the Camera Name field, and complete the Description field. Select the correct entries for the Time Zone, Date, and Time settings. Then click Next.

H IMPORTANT: You MUST connect the Camera to a router, switch, or PC using an Ethernet network cable BEFORE powering on the Camera. Otherwise, the Camera will not function.

NOTE: The default IP address of the Camera is 192.168.1.115.

NOTE: If you want to connect the Camera to a wireless network for setup, refer to the User Guide on the Setup CD-ROM for instructions.

If you want to connect the Camera directly to your PC, use a crossover Ethernet network cable (not included).
After the files have been successfully copied, the Congratulations screen will appear. Click the Install Viewer & Recorder Utility button to install the Camera’s Utility on your PC. This Utility provides a convenient way to record the Camera’s video.

Enter your wireless network’s SSID or network name. If you chose Ad-Hoc mode, select the channel at which the network broadcasts its wireless signal. Then click Next.

Then click Next.

If you entered a Passphrase, you will see the automatically generated WEP key. Otherwise, manually enter the WEP key in the Key 1 field. Click OK.

Review your settings before the Setup Wizard starts to copy your files. Click Save.

After you clicked the Install Viewer & Recorder Utility button, the Welcome screen will appear. Click Next.

The Choose Destination Location screen will appear. To install the Viewer & Recorder files in the default folder, click Next. To select a different folder, click Browse and follow the on-screen directions.

To add program icons to the desktop, select one from the Existing Folders list, and then click Next.

When you see the screen shown in Figure D, click OK.

When the setup is complete, click OK.

To open the Viewer & Recorder Utility, double-click its shortcut on your desktop.

After you selected a destination folder, the Setup Wizard will copy the Viewer & Recorder Utility files to your PC. This Utility provides a convenient way to record the Camera’s video.

NOTE: On the Congratulations screen of the Setup Wizard, you can click the Setup SoloLink DDNS Service button to take advantage of the Camera’s Dynamic Domain Name System (DDNS) feature. This is useful for remote access of the Camera via the Internet. Refer to the SoloLink Quick Installation for more information.

Unplug the power adapter from the electrical outlet.

Unplug the Ethernet network cable from the Camera as well as the PC, router, or switch.

Place the Camera in the location you want.

Plug the power adapter into a local electrical outlet.

The Ready LED flashes while the Camera is initializing. When the Ready and Wireless LEDs are solidly lit, the Camera is ready for use.

Aim and focus the Camera accordingly.

Congratulations! The installation of the Wireless-B Internet Video Camera is complete.

NOTE: To view video using a web browser, you must use Internet Explorer version 5.5 or higher. The View Video feature will not work with Netscape. Netscape users should use the Viewer & Recorder Utility instead.
